# INDUSTRIAL **SAFETY**

Safe systems for mechanical engineering and intralogistics

# HELLO WIELAND ELECTRIC

---

**Tradition and innovation - Wieland is representing the synergy of these two guiding principles for more than 100 years.**

At Wieland Electric, we are proud to be the world market leader in electrical connections, and have been focusing on safe and innovative technologies since our founding. The beginnings of our success lie in the legendary Wieland Clamp, the first-ever safe electrical connector. Since then, innovation has pushed us to develop safer and more efficient ways to electrify the world.

Expanding from a component-only manufacturer, we are now one of the leading suppliers of innovative, future-oriented, and complete electrical solutions. We divide our focus into two main areas, Building and Industry. Our Building Solutions focus on decentralized power distribution and pluggable connections in all kinds of architectures and infrastructures. From in-store displays and lighting to hospitals and airports, and any structure in between – you build it, we power it! Our Industry Solutions center around functional safety for machines, industrial networking, and power distribution.

At Wieland, we keep your productivity going in mechanical engineering, wind power, material handling, HVAC, and many other industries.

We are at our customers' side in every step of the project, right from the start. Our experts offer consulting, on-site services, and technical support. We see ourselves as service providers, trainers and subject-matter experts.

# OVERVIEW

From the safety sensors of the **sensor** PRO series through the **safe** RELAY safety relays and the modular, with the screwdriver configurable, safety modules **samos**<sup>®</sup> to the programmable modular safety control **samos**<sup>®</sup> PRO you always get the suitable product for the protection of man and machine.

## Tested technology

Of course, Wieland Electric offers only thoroughly tested and certified safety technology (i.e., all technical safety products have been approved by recognized testing institutes and meet current regulations and standards).

### WE OFFER YOU:

- + INTUITIVE SOFTWARE
- + MODULAR SAFETY CONTROLLER
- + COMPACT SAFETY CONTROLLER
- + UNIVERSAL SAFETY RELAYS
- + SAFE SIGNAL DETECTION

**SAMOS**<sup>®</sup> PRO

**SAMOS**<sup>®</sup>

**SAFE** RELAY

**SENSOR** PRO

# FIT FOR **SAFETY**

Wieland supports and advises you – from the planning stage right through to start-up – throughout the entire life cycle of a machine or production system. The broad portfolio of safety switching devices covers all important safety functions and fulfills even complex customer requirements.

## **IMPORTANT STANDARDS FOR MORE SAFETY**

The safety products from Wieland Electric fulfil a number of international standards and regulations with machine and system safety for various applications playing a major role.

## **SOLUTIONS FOR MANY INDUSTRIES**

The safety requirements for machine and system control are becoming more demanding in all areas. Wieland Electric offers tailored, innovative solutions ranging from sensors right down to safety control.

### **SOLUTIONS:**

- + MACHINE BUILDING INDUSTRY
- + MACHINE TOOLS
- + WOOD WORKING
- + PLASTIC PROCESSING
- + PRESSES
- + PACKAGING MACHINES
- + INTRA LOGISTICS

- 
- ▶ EN/IEC 60204-1
  - ▶ EN/IEC 61508
  - ▶ EN/IEC 62061
  - ▶ EN ISO 13849-1
  - ▶ EN/IEC 61511

safety

# SAMOS<sup>®</sup> PRO

---

The safety controller of the next generation

With the highest power in the smallest space, the safety control samos<sup>®</sup> PRO sets new standards in the area of machine automation.

---

## OVERVIEW OF BENEFITS

- License free, intuitive programming with samos<sup>®</sup> PLAN 6
- All-in-one basic module with gateway
- Compact basic module with up to 16 inputs, 4 outputs and 4 configurable Inputs/outputs
- High scalability up to 12 digital and analog extension modules
- Extreme operation temperature range from -25°C to +65°C
- 4A switching power at every output pair to save small contactors or relays
- Easy on-site diagnosis thanks LEDs for all inputs and outputs
- Global remote diagnostics via Ethernet

# SAMOS<sup>®</sup> PRO COMPACT + MOTION

## Enhanced functionality

\* These features are available with an additional expansion module

The last letter on the nameplate has the following meaning: **-A**: Screw terminals, **-C**: Push in terminals

# SAMOS® PLAN 6 PROGRAMMING SOFTWARE

---

## Intuitive + flexible + license-free

Our samos® PLAN 6 programming software for the samos® PRO range now makes programming even easier. samos® PLAN 6 assists PLC programmers, electrical design engineers and developers with the planning, validation, verification and documentation of the safety application.

- + Intuitive operation through automatic hardware configuration
- + Error-free commissioning through integrated simulation and logic analysis
- + Comprehensive library with TÜV-certified function blocks
- + Comfortable operation with multiple screens, dockable and undockable windows
- + Fast setup of the machine through forcing
- + Configurable project documentation with one mouse click (one-click report)

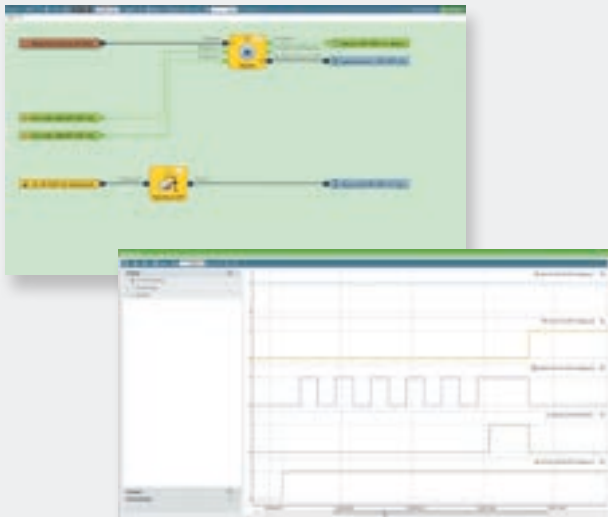

## INTUITIVE CONFIGURATION

samos® PLAN 6 offers automatic hardware configuration.

- Easy entry to programming
- No detailed product knowledge required
- Select features instead of modules
- On-the-fly configuring & programming
- Less engineering effort

samos®PRO

## SIMULATION INSTEAD OF TESTING

Simulate your programmed logic in real-time on the PC instead of looking for faults on the machine.

- Offline function simulation
- Signal selection via drag & drop
- Fast signal change and debouncing
- Deceleration up to a factor of 20
- Export to Excel or PDF with one click

## FASTER VALIDATION

In online mode with oscilloscope function, you can quickly validate, verify and document your safety functions on-site.

- Online recording on a laptop
- Long-term recording for troubleshooting
- Validation and verification on-site
- Fast documentation via PDF export

## PARAMETERIZATION INSTEAD OF PROGRAMMING

Error-free parameterization through TÜV-certified application modules.

- Simplified CE declaration thanks to TÜV-certified function blocks
- Functions for presses
- Muting functions, specially for light grids and light curtains
- Adjustable switch on and off delay
- Analog signal processing

## FLEXIBLE SCREENS

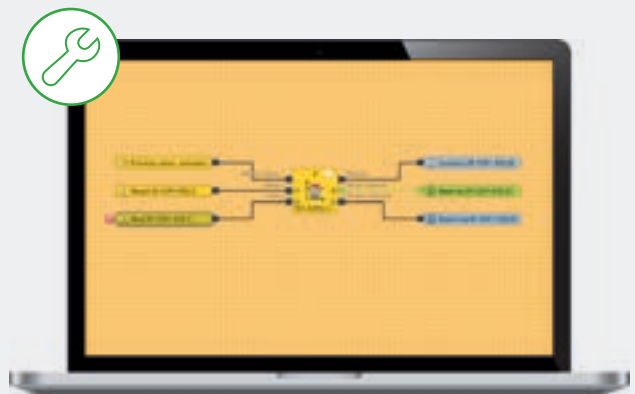

Configure the software to fulfill your requirements by individually adapting your workspace.

- Docking and undocking window arrangement
- Flexible with multiple screens
- Clear diagnosis, verification and troubleshooting
- Selectable Start view (HW, logic)
- Customized and savable layouts (laptop, PC, tablet)

## FAST MACHINE SETUP

Simply emulate missing sensor hardware with the forcing function.

- Comfortable machine setup with forcing for missing sensors
- Time-limited forcing up to 8 hours
- Minimal errors at shift change
- Fast troubleshooting thanks to diagnostics messages

## GLOBAL REMOTE DIAGNOSTICS

With samos® PLAN 6 and the integrated Ethernet interface, you and your system are connected worldwide, therefore you save expensive service call outs.

- Initial diagnosis via LEDs, Touch Panels or PLCs
- Remote diagnosis via integrated Ethernet
- Remote access to samos® PRO via VPN router
- Remote via LAN, WLAN or mobile radio
- Fast troubleshooting during machine breakdown
- Advanced security against manipulation

**3.8 Sicherheitskennwerte**

Name	Typ	Stk.	Kategorie
SP-COP1-APS121	PS	1	Wartung
SP-COP1-APS122	PS	1	Kategorie 1
SP-COP1-APS123	PS	1	Kategorie 2

Die Sicherheitskennwerte gelten ausschließlich für die entsprechenden externen Ausgänge der SP-COP und SP-SDIO Module. Sie sind in den Hardware-Handbüchern und nicht für angeschlossenem Service oder AMBA.

## ONE-CLICK REPORT GENERATION

Document your projects with one click.

- Cover sheet with project info and CRC
- Optional manipulation protection with falsification code
- Easy to order thanks to parts list
- Time saving with wiring examples
- Safety values (SIL, Kat, PL, PFHd)
- Comfortable calculation of the overall performance level

## PROTECTION AGAINST MANIPULATION

Protect your machines against manipulation and hacker attacks with the new "Advanced Security" capability.

- No project modification on the controller without falsification code
- Extra precautions against unauthorized access via Ethernet
- Project runs only on a specified controller
  - ▶ More control over spare parts business
- The controller runs only with the original project
  - ▶ Protection against SD card change

# SAMOS® PRO COMPACT

## BASIC MODULE

### APPLICATIONS

- Machine building industry
- Intra logistics

### SAFETY LEVEL

- SIL<sub>CL</sub> 3 (EN 62061-1)
- PL e/Category 4 (EN ISO 13849-1)

### FEATURES

- 16 inputs, 4 outputs and 4 configurable Inputs/outputs
- 116 safe inputs and 52 outputs with I/O extension modules
- Extension with 2 external gateway modules
- Mini USB programming interface
- Display for data (temperature, counter) in samos® PLAN 6
- Data about gateways for HMLs or SPSn
- SD slot for program memory (Order type SD card: SP-COP-CARD)
- Library for analog value processing, combustion technology, muting and press
- Terminals are included in the scope of delivery

### OVERVIEW OF DEVICES

Type	Rated voltage	Terminals	Features	Part no.	P.U.
SP-COP2-EN-A	24 V DC	Screw terminals, pluggable	Muting, Ethernet, press, analog	R1.190.1210.0	1
SP-COP2-EN-C	24 V DC	Push-in terminals, pluggable	Muting, Ethernet, press, analog	R1.190.1220.0	1
SP-COP2-ENI-A	24 V DC	Screw terminals, pluggable	Muting, Industrial Ethernet, press, analog	R1.190.1310.0	1
SP-COP2-ENI-C	24 V DC	Push-in terminals, pluggable	Muting, Industrial Ethernet, press, analog	R1.190.1320.0	1

SP-CABLE-ETH1

## SAMOS®PRO ACCESSORIES

Contents of the starter set

- SP-COP-CARD1: Memory-card for SP-COP
- SP-CABLE-USB1: USB cable for SP-COP, 1.8 m
- SP-CABLE-ETH1: Ethernet cable for SP-COP, 2 m
- Programming software samos®PLAN 6

You can get the free programming tool samos®PLAN 6 at [www.wieland-electric.com](http://www.wieland-electric.com)  
Support / Software & Apps

# STARTER SET & ACCESSORIES

HMI-ECO

## FURTHER SAMOS®PRO ACCESSORIES

---

- For HMI-ECO touch panels and hmi plan visualization software, see Industrial Communication brochure (0801.0)

WTP 1,5 I/O -3

- Three-wire initiator/actuator terminal with push-in connection for mounting on MR 35

SHIELDED CABLE TERMINALS  
FASIS WST .../T35

- For mounting on TS 35 mounting rail

SAFETY  
SCHRAUBKL. SET

- Screw terminal set with 4 different codings for 5 devices

SAFETY  
PUSH IN SET

- Push-in terminal set with 4 different codings for 5 devices

## OVERVIEW OF DEVICES

Type	Description	Part no.	P.U.
SP-COP-CARD1	Memory-card for SP-COP	R1.190.1000.0	1
SP-CABLE-USB1	USB cable for SP-COP, 1.8 m	R1.190.1010.0	1
SP-CABLE-ETH1	Ethernet cable for SP-COP, 2 m	R1.190.1020.0	1
SP-FILTER1	samos® PRO-Output-Filter, 680nF	R1.190.0260.0	1
SP-FILTER2	samos® PRO-Output-Filter, 2,2uF	R1.190.0270.0	1
SP-COP-STARTER-SET	Content: SP-COP2-EN-A, SP-COP-CARD1, SP-PLAN6, SP-CABLE-USB1, SP-CABLE-ETH1	R1.190.1100.0	1
HMI-LICENSE-SINGLE	Single-user license for HMIs, programming software for HMIs	ZW.000.0170.0	1
HMI-ECO-043	HMI Eco touch panel, 4.3" color, TFT, 480x272 pixels	83.050.0000.0	1
HMI-ECO-070	HMI Eco touch panel, 7" color widescreen, TFT, 800x480 pixels	83.050.0001.0	1
HMI-ECO-100	HMI Eco touch panel, 10" color, TFT, 1024x600 pixels	83.050.0002.0	1
SP-COVER	SD card slot cover for SP-COP modules	R1.190.1040.0	1
SAFETY-SCHRAUBKL.SET	Screw terminal set with 4 different codings for 5 devices	99.208.9999.9	1
SAFETY-PUSH IN SET	Push-in terminal set with 4 different codings for 5 devices	99.209.9999.9	1
WTP 1,5 I/O -3	fasis - multi-tier block with diodes	56.202.8055.0	100
APFN 2,5 E/35	End plate	07.312.7355.0	10
WST 8 / TS 35	Shield cable terminals for mounting on mounting rail for cable diameters from 3 to 8 mm	Z2.803.6010.0	10
WST 13,5 / TS 35	Shield cable terminals for mounting on mounting rail for cable diameters from 4 to 13.5 mm	Z2.803.6110.0	10
WST 20 / TS 35	Shield cable terminals for mounting on mounting rail for cable diameters from 10 to 20 mm	Z2.803.6210.0	10

# SAMOS® – SAFETY MADE SIMPLE

---

samos® stands for SAFety MOdular System. The safety system with just a multifunctional, permanently coded basic module is built on the modular kit principle and grows module by module along with the safety task.

- samos® combines a wide variety of safety sensors which monitor a machine or system for technical safety either individually, in combination or all together.
- samos® replaces special devices with pre-defined, practice-oriented function blocks for monitoring emergency stop, position switches, two-hand buttons and light curtains, for example.
- samos® uses safe logical link functions for simple creation of dependent or independent safety zones.
- samos® offers comprehensive diagnosis by gateways via Profibus-DP, CANopen and DeviceNet or via Industrial Ethernet.

---

All safety functions are set with a screwdriver without programming software and can be read at the device.

EXAMPLE: SINGLE FUNCTIONS

-  Emergency stop
-  Safety door
-  Controlled stopping
-  Monitoring BWS type 4
-  Monitoring BWS type 2 with testing
-  Testable PDF sensors
-  Safe position monitoring
-  Static valve monitoring
-  Two-hand applications to IIIA and IIIC
-  4-wire switching mats

Set release delay of output Q4 or Q3 and Q4

EXAMPLE: COMBINATION FUNCTIONS

-  TYPE 4/2
- 
-  TYPE 4/2
- 

EXAMPLE: DUAL FUNCTIONS

- 
-  TYPE 4/2

EXAMPLE: SPECIAL FUNCTIONS

-  MAX. 5 s Jog mode
-  SETUP Setup mode
-  MUTING and BYPASS

# SAMOS® – MAXIMUM FLEXIBILITY

## INTELLIGENTLY CONNECTED MODULES

The modules are connected to a standard DIN rail and pressed together. Connected on the left of the rail is the Master, the obligatory base module (with coding 1), input modules (coding matches the base module arranged to the left) and relay output modules. All modules in the samos overall system are permanently coded and are always permanently assigned to a similarly permanently coded basic module, which eliminates any confusion during service work, for instance.

The relay modules are integrated in the function via external wiring. If necessary such system group are made up of basic modules, input modules and relay output modules can be wired together. This allows the implementation of a wide variety of input/output functions with separate or combined effects.

## FUNCTIONS WITH ADDED VALUE

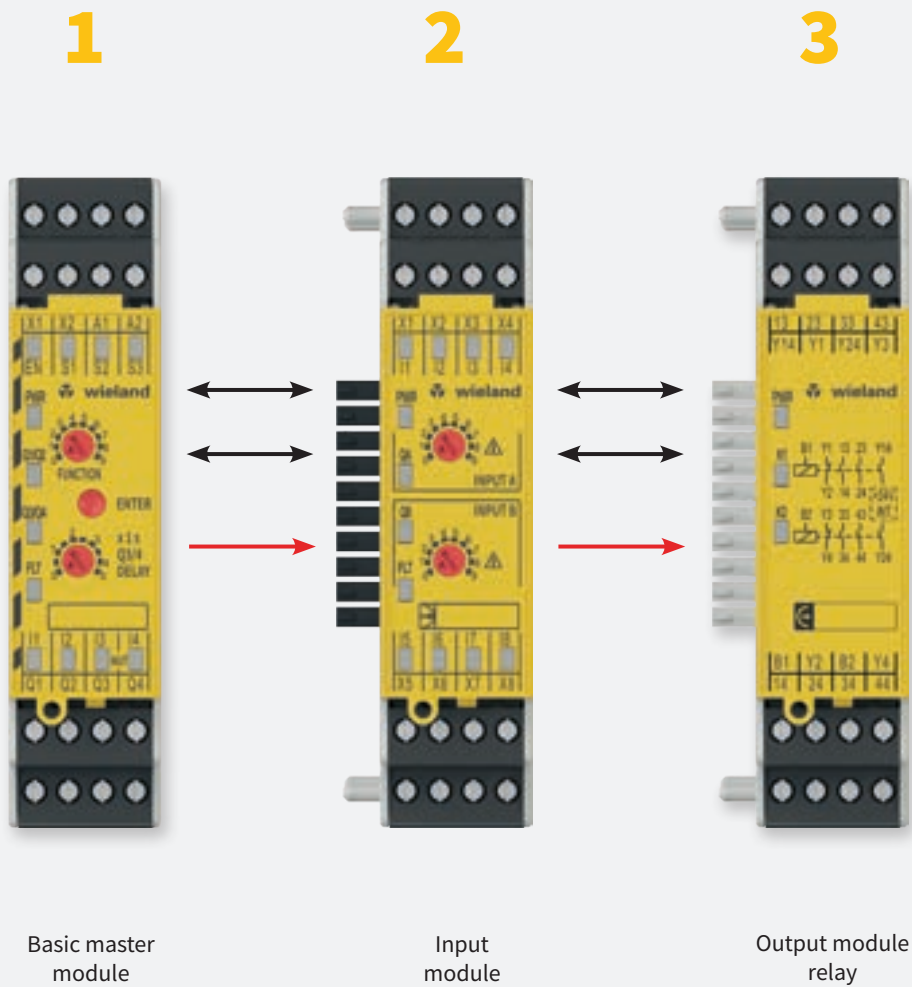

The functions of the basic module and the input modules are set either individually or in combination on the front with 10-position rotary switches (e.g. emergency stop and protective door monitoring with controlled shutdown). Additional functions such as automatic reset, startup and re-startup blocking or retriggering of the off-delay are implemented with terminal configuration.

## samos® MODULES

Clear handling – maximum flexibility

The clear and simple user interface helps to implement safe solutions.

## MODULAR DESIGN

In its maximum configuration **samos®** consists of one basic master module and additional modules to expand function blocks, inputs and outputs.

- Up to **12** safe active modules (input modules)
- Up to **4** additional safe passive output module relays

### 1 Basic master module

Safety module with 9 function blocks, 8 safe inputs and 4 safe outputs (also suitable for stand-alone operation)

### 2 Input module

Expansion module with 10 function blocks and 8 safe inputs

### 3 Output module relay

Expansion modules with 2 or 4 safe, potential-free relay contacts

# SA-BM

## BASIC MODULE

### APPLICATIONS

- Machine building industry
- Intra logistics

### SAFETY LEVEL

- SIL<sub>CL</sub> 3 (EN 62061-1)
- PL e / Category 4 (EN ISO 13849-1)

### FEATURES

- 9 function blocks
- 4 inputs for safety sensors
- 4 safe semiconductor inputs
- Adjustable OFF- delay

### OVERVIEW OF DEVICES

Type	Rated voltage	Terminals	Coding	Part no.	P.U.

# SAFE RELAY – UNIVERSAL SAFETY RELAYS

The safeRELAY safety relays offer customized solutions for the safety of man and machine.

These devices combine excellent technical performance with efficient use in everyday industrial applications. Compact design, flexible use and flexible connection methods are the decisive advantages of these devices.

Depending on the application and the selected device, the safety relays can be used up to PL e / Category 4 (EN ISO 13849-1) or SIL 3 (EN 62061).

## VERSATILE APPLICATION OPTIONS

- Emergency stop monitoring
- Monitoring of protective doors and interlocks
- Light curtain monitoring
- Two-hand relay
- Monitoring of valves and limit value switches
- Safe contact expansions

Further informations about the screw terminal set and the push-in terminal set see page 23.

## safeRELAY

### Safety relays

The simple and safe connection for every situation.

### SNA, SNO, SNS, SNZ

---

#### Basic devices

The basic devices of the SNA, SNO, SNS and SNZ device families feature a safe internal logic component for the monitoring of the respective safety functions.

### SNV

---

#### Basic devices with time function

The basic devices of the SNV device families feature a safe internal logic component for the monitoring of the respective safety functions.

In addition, these devices offer time-delayed, safe outputs and a corresponding time setting on the device.

### SNE

---

#### Contact expansion relays

The contact expansion relays of the SNE device family feature a redundant internal structure and are used for contact multiplication on, for example, basic devices.

# SNO 4083KM

## MONITORING OF EMERGENCY STOP, SAFETY GATES AND LIGHT BARRIERS

### APPLICATIONS

- Protection of people and machinery
- Monitoring of emergency stop applications
- Monitoring of safety gates
- Monitoring of light barriers

### SAFETY LEVEL

- Up to PL e / Category 4 (EN ISO 13849-1)
- Up to SIL<sub>CL</sub> 3 (EN 62061)

### FEATURES

- Stop Category 0 according to EN 60204-1
- Single-channel or two-channel control
- Two-channel control with NC/NC or NC/NO
- Manual or automatic start
- SafeStart
- Cross monitoring
- Synchronous time monitoring for two-channel control
- 3 enabling current path / 1 signalling current path

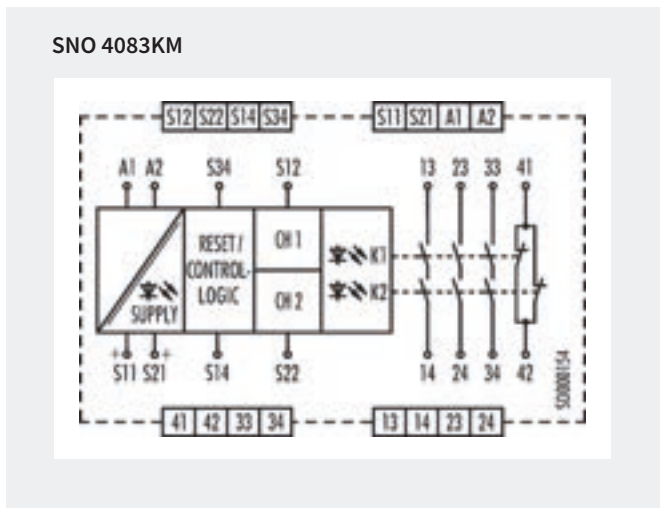

### FUNCTION

After the supply voltage is applied to terminals A1/A2 and the safety inputs are closed, the enabling current paths (NO contacts) are closed and the signal current path (NC contact) is opened automatically or by pressing the reset button (manual monitored start). When the safety inputs are opened/ de-energized the enabling current paths (NO contacts) are opened immediately and the signal current path (NC contact) is closed.

- **Reduced installation work** – The SNO 4083KM requires fewer connection cables, irrespective of whether operation with or without cross monitoring is desired. This saves time and money when it comes to wiring.

- **Universal application** – The two-channel control of the device is carried out by either an NC/NC or an NC/NO combination of the safety sensor. In the case of two-channel control of the device, a synchronous time is automatically monitored between the two channels.
- **SafeStart function** – When the device is used with a manual start, the reset input is automatically monitored for a rising and falling signal edge. A manual reset signal is only accepted if the control inputs of the device are activated by the safe transducer (e.g. emergency stop button) during the entire activation procedure.
- **Monoflop function** – This function is integrated into the device and prevents device interlocking under all circumstances. This is a decisive advantage in applications where very short interruptions of the safety-related signals can occur, or in the case of transducers with bouncing contacts or safe optical sensors (BWS), for example.
- **Simple diagnosis** – The device features an intelligent display system that shows the user the different operating modes of the device in its different applications. This means, for example, that when the control inputs are closed and manual start has been selected, a reset signal is displayed, which has not yet been given. Fault states in the control (e.g. synchronous time exceeded or a short-circuit in two-channel control) are also signaled to the user via a blinking code.

	DC-13	$U_e 24\text{V}, I_e 5 \text{ A}$
Short-circuit protection (NO), lead fuse / circuit breaker	6 A class gG / melting integral < 100 $\text{A}^2\text{s}$	
Mechanical life	$10^7$ switching cycles	
<b>General data</b>		
Creepage distances and clearances between the circuits	EN 60664-1	
Protection degree according to EN 60529 (housing / terminals)	IP40 / IP20	
Ambient temperature / storage temperature	$-25^\circ\text{C} - +65^\circ\text{C} / -25^\circ\text{C} - +75^\circ\text{C}$	
Wire ranges screw terminals,	fine-stranded / solid	$1 \times 0.2 \text{ mm}^2 - 2.5 \text{ mm}^2 / 2 \times 0.2 \text{ mm}^2 - 1.0 \text{ mm}^2$
	fine-stranded with ferrules	$1 \times 0.25 \text{ mm}^2 - 2.5 \text{ mm}^2 / 2 \times 0.25 \text{ mm}^2 - 1.0 \text{ mm}^2$
Permissible torque	0.5 - 0.6 Nm	
Wire ranges push-in terminals	$1 \times 0,25 \text{ mm}^2 - 1.5 \text{ mm}^2$	
Weight	24 V AC/DC device / AC device	0.2 kg
Standards	EN ISO 13849-1, EN 62061, EN 81-20/50, EN 50156-1, EN 61511	
Approvals	TÜV, cULus Listed, CCC	

<sup>1)</sup> If two-channel devices are installed as single channel, the value is halved.

# SNO 4062K/KM

## MONITORING OF EMERGENCY STOP, SAFETY GATES AND LIGHT BARRIERS

### APPLICATIONS

- Protection of people and machinery
- Monitoring of emergency stop applications
- Monitoring of safety gates
- Monitoring of light barriers

### SAFETY LEVEL

- Up to PL e / Category 4 (EN ISO 13849-1)
- Up to SIL<sub>CL</sub> 3 (EN 62061)

### FEATURES

- Stop Category 0 according to EN 60204-1
- Reset button monitoring
- Manual or automatic start
- Single-channel or two-channel control
- Cross monitoring
- 2 enabling current paths, 1 signal current path

### FUNCTION

#### SNO 4062K

The device is a two-channel switching device for emergency stop applications with self-monitoring on each ON-OFF cycle. It complies with EN 60204-1 and is equipped with forcibly guided relays.

#### BASIC FUNCTION:

With supply voltage applied to terminals A1/A2 and the safety inputs closed, pressing the reset button closes the enabling current paths (manual start). When the safety inputs are opened/ de-energized the enabling current paths will open.

- **Manual start** When the safety inputs are closed, a button is used to open reset input S34 (triggering with falling edge) or to close reset input S35 (triggering with rising edge).
- **Automatic start** Reset input S35 is connected to S33. The device starts with the rising edge of the signal on safety input S12.

#### SNO 4062KM

The function of this device corresponds to that of the SNO 4062K without synchrocheck. The device is suitable for connecting to light curtains for Type 4 (EN 61496-1) and connecting to short-circuit forming 4-wire safety mats, switching strips or switching edges (without monitoring resistance).

- **Safety mats** The device must be operated with two channels and cross monitoring. If there is resistance < 50 Ω / channel and a short circuit between the channels (S11/S12 and S21/S22) the enabling paths open and the SUPPLY LEDs flashes.
- **Light curtain for Type 4 (EN 61496-1)** The device will be operated with two channels and without cross monitoring, if the light curtain connected to the OSSD detects a shunt fault on its own.

For applications with tactile operating modes (rapid ON-OFF cycles, for example with manual supply) we recommend using SNO 4062KM.

## MONITORING OF EMERGENCY STOP, SAFETY GATES AND LIGHT BARRIERS

### APPLICATIONS

- Protection of people and machinery
- Monitoring of emergency stop applications
- Monitoring of safety gates
- Monitoring of light barriers

### SAFETY LEVEL

- Up to PL e / Category 4 (EN ISO 13849-1)
- Up to SIL<sub>CL</sub> 3 (EN 62061)

### FEATURES

- Stop Category 0 according to EN 60204-1
- Manual or automatic start
- Cross monitoring
- Single-channel or two-channel control
- 3 enabling current paths

### FUNCTION

#### SNO 4063K

The device is a two-channel switching device for emergency stop applications with self-monitoring on each ON-OFF cycle. It complies with EN 60204-1 and is equipped with forcibly guided relays.

After supply voltage has been applied to the A1/A2 terminals and the safety inputs have been closed, pressing the reset button closes the enabling current paths (manual start). When the safety inputs are opened/de-energized the enabling current paths will open.

- **Manual start** When the safety inputs are closed, a button is used to open reset input S34 (triggering with falling edge) or to close reset input S35 (triggering with rising edge).
- **Automatic start** Reset input S35 is connected to S33. The device starts with the rising edge of the signal on safety input S12.

#### SNO 4063KM

The function of this device corresponds to that of the SNO 4063K. The device is suitable for connecting to light curtains for Type 4 (EN 61496-1) and to short-circuit forming 4-wire safety mats, switching strips or switching edges (without monitoring resistance).

- **Safety mats** The device must be operated with two channels and cross monitoring. If there is resistance  $< 50 \Omega$  / channel and a short circuit between the channels (S11/S12 and S21/S22) the enabling paths open and the SUPPLY LEDs flash.
- **Light curtain for Type 4 (EN 61496-1)** The device will be operated with two channels and without cross monitoring, if the light curtain connected to the OSSD detects a shunt fault on its own.

For applications with tactile operating modes (rapid ON-OFF cycles, for example at manual supply) we recommend the use of SNO 4063KM.

MONITORING OF EMERGENCY STOP, SAFETY GATES AND LIGHT BARRIERS

## APPLICATIONS

- Protection of people and machinery
- Monitoring of emergency stop applications
- Monitoring of safety gates
- Monitoring of light barriers

## SAFETY LEVEL

- Up to PL e / Category 4 (EN ISO 13849-1)
- Up to SIL<sub>CL</sub> 3 (EN 62061)

## FEATURES

- Stop Category 0 according to EN 60204-1
- Single-channel or two-channel control
- Automatic start
- Manual reset without monitoring
- Cross monitoring
- 3 to 4 enabling current paths

## FUNCTION

Emergency stop and safety gate monitor The safety switching devices of our SNA product line are used to monitor safety sensors (emergency stop buttons, safety gate switches, etc.), feature a large number of safety switching contacts (3 NO contacts/1 NC contact or 4 NO contacts) with a total width of only 22.5 mm at a constant current of up to 8 A. They can be implemented in the extended temperature range up to 65° C.

- **Automatic start** – Reset input S34 is connected to safety input S11. To monitor external contact blocks (EDM), their NC contacts must be connected in series between S34 and S11.
- **Manual start without monitoring** – Reset input S34 is connected to safety input S11 via a RESET button. To monitor external contact blocks (EDM), their NC contacts must be connected to the RESET button in series.
- **Monitoring of light curtains** – The KM device types are especially suitable for the monitoring of very fast tactile switching operations, for example in safety light curtain applications. Very short switch-off procedures of a few milliseconds are detected reliably and lead to the switching off of the internal relays.

## MONITORING OF EMERGENCY STOP, SAFETY GATES AND LIGHT BARRIERS

### APPLICATIONS

- Monitoring of emergency stop applications
- Monitoring of safety gates
- Monitoring of light barriers

### SAFETY LEVEL

- Up to PL e / Category 4 (EN ISO 13849-1)
- Up to SIL<sub>CL</sub>3 (EN 62061)

### FEATURES

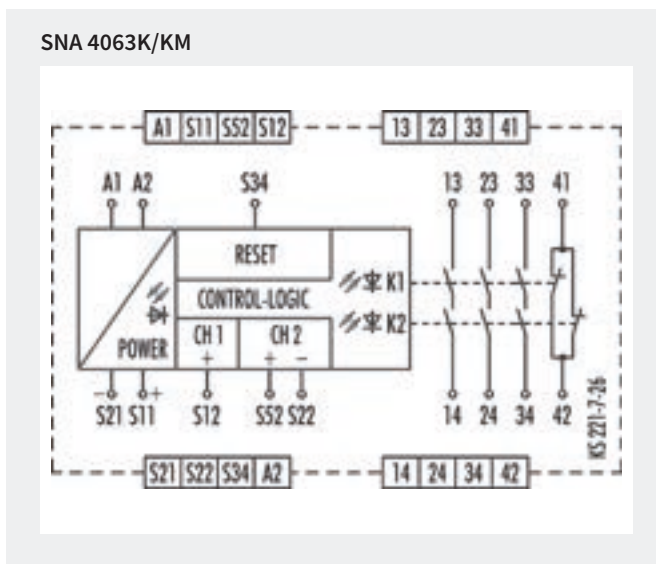

- Stop Category 0 according to EN 60204-1
- Single-channel or two-channel control
- Manual reset with monitoring
- Cross monitoring
- 3 to 4 enabling current paths

### FUNCTION

After the supply voltage is applied to terminals A1/A2 and the safety inputs are closed, the enabling current paths (NO contacts) are closed and the signal current path (NC contact) is opened by pressing the reset button (manual start with monitoring). When the safety inputs are opened/de-energized, the enabling current paths (NO contacts) are opened immediately.

- **Manual start with monitoring** – Reset input S34 is connected to safety input S11 via a RESET button. To monitor external contact blocks (EDM), their NC contacts must be connected in series to the RESET button.
- **Monitoring of light curtains** – The **KM device types** are especially suitable for the monitoring of very fast tactile switching operations, for example in safety light curtain applications. Very short switch-off procedures of a few milliseconds are detected reliably and lead to the switching off of the internal relays.

## MONITORING OF EMERGENCY STOP AND SAFETY GATES

### APPLICATIONS

- Protection of people and machinery
- Monitoring of emergency stop applications
- Monitoring of safety gates

### SAFETY LEVEL

- Up to PL d / Category 3 (EN ISO 13849-1)\*
- Up to SIL<sub>CL</sub> 2 (EN 62061)\*

### FEATURES

- Stop Category 0 according to EN 60204-1
- Single-channel or two-channel control
- Manual or automatic start
- 3 enabling current paths, 1 signal current path
- Feedback loop for monitoring external contactors

\* PLe contact expansion

### FUNCTION

The device is a single-channel switching device for emergency stop applications with self-monitoring on each ON-OFF cycle. It complies with EN 60204-1 and is equipped with forcibly guided relays.

The device has either two Y2 reset inputs (without reset monitoring) or two Y3 reset inputs (with reset monitoring). The K1 and K2 relays are actuated either automatically (bridge Y1 Y2) or after the reset button (on Y1 Y3) has been pressed. They become self-locking through their own contacts, if there is an electrical connection between terminal A1 and the supply voltage (emergency stop button, position switches).

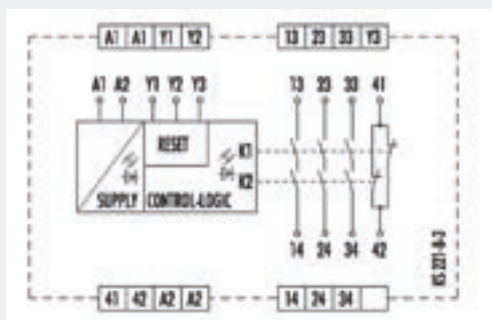

After this switch-on phase the enabling current paths are closed and the signaling current path is open.

If the electrical connections between terminal A1 and the supply voltage are interrupted, the enabling current paths open and the signaling current path closes. The energized state (self-locking) of the two channels is indicated by a green LED K1, K2. The second green LED indicates that supply voltage has been applied. The set-up of an emergency stop facility after stop Category 0 (EN 60204-1) is possible.

# SNO 1012K

## MONITORING OF EMERGENCY STOP AND SAFETY GATES

### APPLICATIONS

- Protection of people and machinery
- Monitoring of emergency stop applications
- Monitoring of safety gates

### SAFETY LEVEL

- Up to PL d / Category 3 (EN ISO 13849-1)
- Up to SIL<sub>CL</sub> 2 (EN 62061)

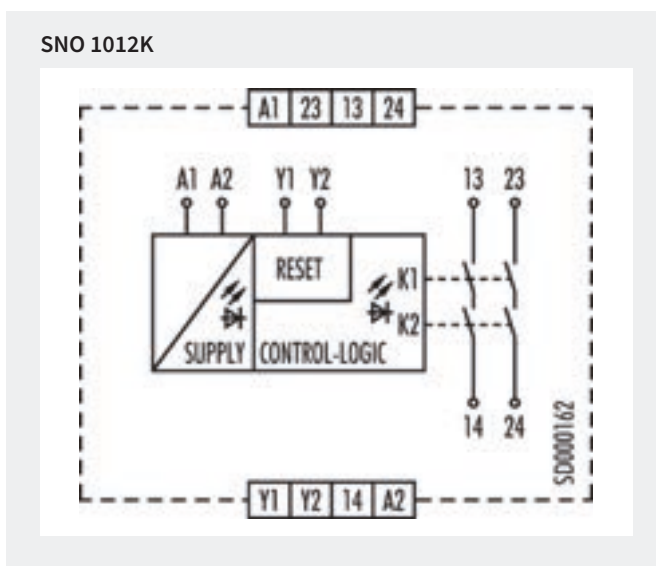

### FEATURES

- Stop Category 0 according to EN 60204-1
- Single-channel or two-channel control
- Manual or automatic start
- 2 enabling current paths
- Check of external contactors (EDM)
- Compact design

### FUNCTION

After the operating voltage (L+/L1) is applied via an unactuated emergency stop button or safety gate contact on A1 and A2, the device can be switched on via a Y1/Y2-connected reset button. When the device is on, the internal relays K1 and K2 are energized and the enabling current paths 13/14 and 23/24 are closed. When the emergency stop button or the safety gate contact is actuated, the current supply of the internal relays is interrupted and the enabling current paths are opened.

# SNS 4074K / 4084K - MOTION RELAY

## SPEED MONITOR WITH SENSORS

### APPLICATIONS

- Standstill monitoring
- Monitoring of electrical lockout devices
- Control of spring-actuated tumblers
- Monitoring of low rotational speeds in setup operation

### SAFETY LEVEL

- Up to PL e / Category 4 (EN ISO 13849-1)
- Up to SIL<sub>CL</sub> 3 (EN 62061)

### FEATURES

- Reliable monitoring of dynamic input signals
- Adjustable monitoring frequency 0.1 – 99 Hz
- 4 selectable operating mode groups
- Single-channel or two-channel control
- Manual or automatic start
- Cross monitoring
- 4 safe semi-conductor outputs

### STANDSTILL MONITORING FUNCTION

The SNS 4084K standstill monitor provides for the safe monitoring of the frequency of a signal at inputs I1 to I4 of the device. If the frequency of the impulses is higher than the frequency set at the rotary switches (0.1 – 99 Hz), outputs Q1/Q2 will switch off. This monitoring function can be used to detect the standstill or a lower, safer rotational speed of a machine.

In applications of this sort, a spring-actuated or magnet-actuated tumbler of an electric interlocking device, for example, can be controlled from the output of the device.

The sensors for the detection of movement can, for example, be two inductive proximity switches or a rotary encoder connected to inputs I1 - I4. The frequency of the impulses to be monitored is set at the two rotary switches and splitter input T1, and is stored in the device on which the ENTER button is pressed while the voltage is applied to the device.

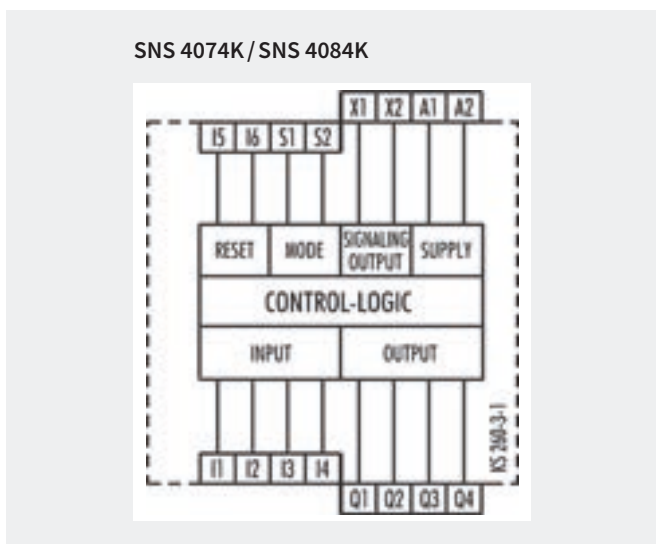

### SNS 4074K

The device features a bypass input, which allows safety-oriented bypassing of the monitoring function, e.g. when a safe position has been reached. In this case, the signal must fulfill at least the safety category of the selected monitoring function.

### SNS 4084K

The device features an input for the implementation of a start override, which allows the safe outputs to be switched off even during machine standstill. This means, for example, that a spring-activated protective locking facility can be activated during machine start-up.

### CIRCUIT DIAGRAM

Terminals	Description
A1	+ 24 V
A2	GND
X1 / X2	Signal output, semi-conductor (plus switching)
S1	Configuration input for operating mode group
S2	Configuration input for operating mode group
I1	Sensor input
I2	Sensor / configuration input (depending on the operating mode group)
I3	Sensor / configuration input (depending on the operating mode group)
I4	Sensor / configuration input (depending on the operating mode group)
I5	Reset input
I6	Bypass input (SNS 4074K) / start override input (SNS 4084K)
Q1 / Q2	Safe Output, semi-conductor (plus switching)
Q3 / Q4	Safe Output, semi-conductor (plus switching), inverted

safe RELAY

# SVM - MOTION RELAY

## SENSORLESS STANDSTILL MONITOR

### APPLICATIONS

- Standstill monitoring
- Monitoring of electrical lockout devices
- Control of spring-actuated tumblers
- Monitoring of low rotational speeds in setup operation

### SAFETY LEVEL

- Up to PL e / Category 4 (EN ISO 13849-1)
- Up to SIL<sub>CL</sub> 3 (EN 62061)

### FEATURES

- Sensorless monitoring of 1-phase and 3-phase motors
- Safe, configurable voltage monitoring
- Automatic operation

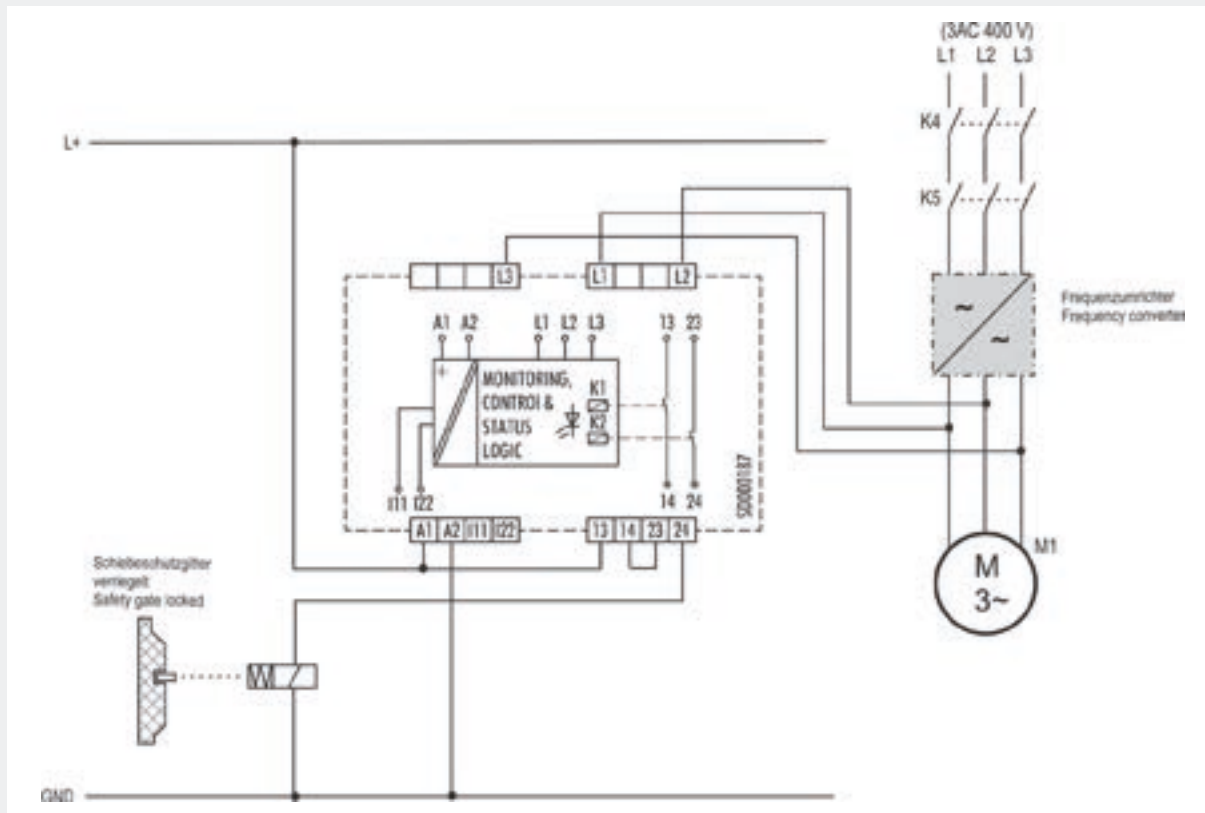

### FUNCTION

The SVM 4001K device monitors machines, the 3-phase powered drive units of which have no movement detection sensors.

When the drives are set in motion or if faults are detected, the standstill monitor relay assumes the rest position.

### APPLICATION

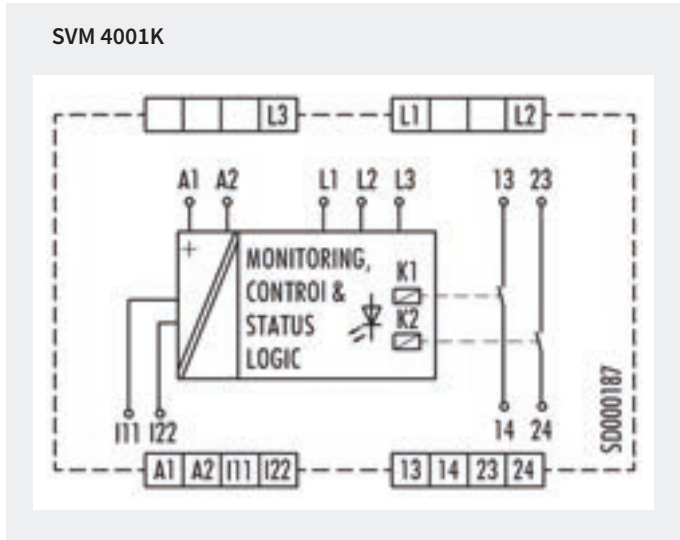

SVM 4001K

## OVERVIEW OF DEVICES

Type	Frequency range	Terminals	Part no.	P.U.
SVM 4001K-A	24 V DC	Screw terminals, pluggable	R1.188.4020.0	1
SVM 4001K-C	24 V DC	Push-in terminals, pluggable	R1.188.4030.0	1

Approvals		TÜV, cULus Listed

# SNZ 4052K

## TWO-HAND RELAY TYPE IIIC

### APPLICATIONS

- Protection of people and machinery
- Monitoring of two-hand applications
- Press
- According to EN ISO 13851 Typ IIIC

### SAFETY LEVEL

- Up to PL e / Category 4 (EN ISO 13849-1)
- Up to SIL<sub>CL</sub> 3 (EN 62061)

### FEATURES

- Stop Category 0 according to EN 60204-1
- Two-channel actuation; 1 NO contact and 1 NC contact for each channel
- Cross monitoring
- Monitoring of synchronous activation
- 2 enabling current paths, 1 signaling current path

### FUNCTION

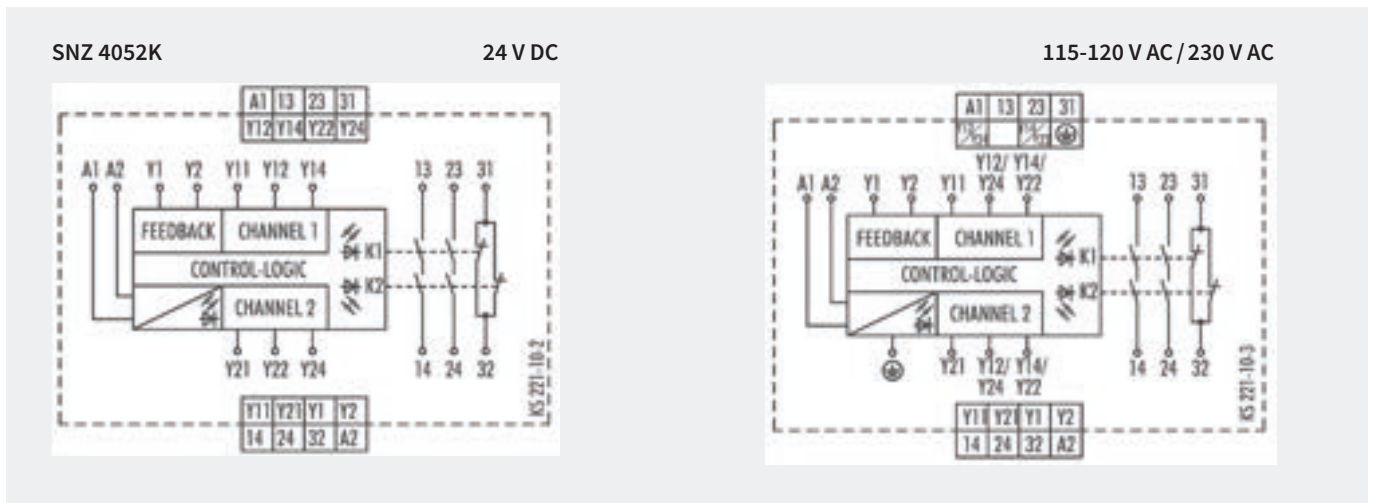

The device complies with EN 574 Type III C safety requirements. The safety behavior of the device is designed for applications according to Category 4 (EN 954-1). The device is single-fault safe and self-monitoring. Synchronous activation of both actuators (two-hand momentary contact or safety gate contacts) is monitored. Each of the two actuators is connected to the device with an NO contact and an NC contact. The technical design of the input circuit provides cross connection and ground fault monitoring. The output function is designed with 2 NO contacts as an enabling current path and 1 NC contact as signaling current path (all forcibly guided).

With supply voltage applied to terminals A1/A2 and the feedback loop (terminals Y1/Y2) closed, the enabling current paths are closed by simultaneously activating the actuators (S1+S2).

Both actuators must be activated within 0.5 s for the output contacts to be enabled. If only one of the two actuators is released, the device is immediately de-energized. The enabling current paths open.

The device can be restarted only after both actuators have returned to their initial position (for example when the two-hand momentary contact switches have been released) and the feedback circuit is closed again. The feedback circuit should only be opened again after both actuators are activated. Otherwise the device will remain in the OFF position. The current status of the device is indicated by 3 LEDs: application of the supply voltage with LED SUPPLY, activation of both actuators with LED K1 and additionally with LED K2 in case of synchronous activation.

## MONITORING OF EMERGENCY STOP, SAFETY GATES AND LIGHT BARRIERS, OFF-DELAYED

### APPLICATIONS

- Protection of people and machinery
- Monitoring of emergency stop applications
- Monitoring of safety gates
- Monitoring of light barriers
- Termination of braking operations through OFF-delay time
- Control of solenoid-actuated interlocks

### SAFETY LEVEL

- Up to PL e / Category 4 (EN ISO 13849-1) for undelayed contacts
- Up to PL d / Category 3 (EN ISO 13849-1) for delayed contacts
- Up to SILCL 3 (EN 62061)

### FEATURES

- Stop category 0/1 according to EN 60204-1
- Single-channel or two-channel control
- Manual or automatic start
- OFF-delay time adjustable in the range 0.15 to 3 s or 1.5 to 30 s
- Reset button monitoring, cross monitoring, monitoring of synchronous time
- 3 enabling current paths (2 undelayed, 1 OFF-delayed)

### FUNCTION

With the supply voltage applied to terminals A1/A2 and the emergency set right and left margins in-line button. This controls relays K1 to K4, which become self-locking (when starting via reset button monitoring after the response time). After this switch-on phase the 3 enabling current paths are closed (terminals 13/14, 23/24 and 37/38). Three LEDs display the state of relays K1/K2, K3/K4 and the supply voltage.

If the emergency stop button is activated, the current supplies for relays K1 to K4 are interrupted. The undelayed enabling current paths (terminals 13/14, 23/24) are opened with release time  $t_{R1}$  while the off-delayed enabling current path (terminals 37/38) is opened after the pre-set OFF-delay time  $t_{R2}$ . The OFF-delay time can be adjusted infinitely in the range 0.15 to 3 s or 1.5 to 30 s.

With a two-channel control and cross-monitoring wiring of the sensor circuit, additional errors such as short-circuit or ground fault can be detected. An electronic fuse protects the device against damage. After the cause of the malfunction has been removed, the device is operational again after approx. 3 s.

- **Reset button monitoring** – The device can be started either with the falling edge or with the rising edge (terminals S34 or S35). For emergency stop applications with manual start the button must be connected to terminals S33/S34. The device is enabled only with the falling edge of the reset signal. For starting, the reset button must be pressed and released. For safety gate applications in which an automatic start is performed it is necessary to bridge terminals S33/S35. The device will react at the rising edge of input S12 which is internally connected to S33.
- **Monitoring of synchronous time** – The use of safety limit switches for single-channel or two-channel circuits in safety gate applications depends on the required safety level. The device provides a monitoring of the synchronous time of two connected safety switches. A synchronous time  $t_s \approx 0.5$  s requires limit switches positioned in such a way that channel 1, terminals S11/S12, closes before channel 2, terminals S21/S22. If channel 2 closes before channel 1, the synchronous time is  $t_s = \infty$ .

# SNV 4063KP

MONITORING OF EMERGENCY STOP, SAFETY GATES AND LIGHT BARRIERS, ON-DELAYED

## APPLICATIONS

- Protection of people and machinery
- Monitoring of emergency stop applications
- Monitoring of safety gates
- Monitoring of light barriers
- Monitoring of interlocking installation with position switches and integrated locking
- Control of spring-actuated interlocks

## SAFETY LEVEL

- Up to PL e / Category 4 (EN ISO 13849-1)
- Up to SIL<sub>CL</sub> 3 (EN 62061)

## FEATURES

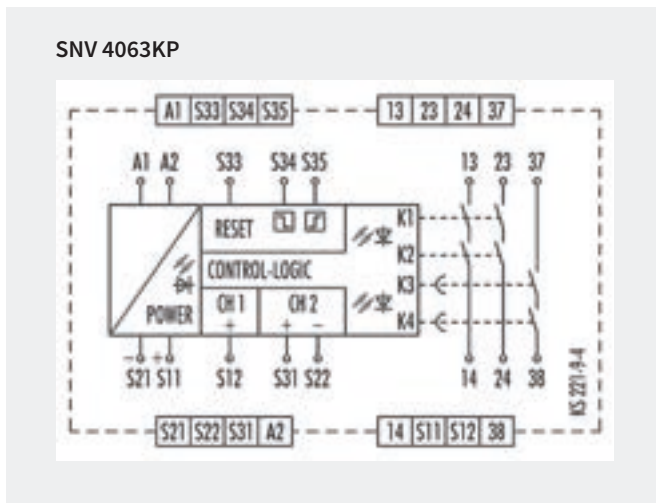

- Stop Category 0 according to EN 60204-1
- Single-channel or two-channel control
- Manual or automatic start
- ON-delay time adjustable in the range 0.15 to 3 s or 1.5 to 30 s
- Reset button monitoring, cross monitoring
- 3 enabling current paths (2 undelayed, 1 ON-delayed)

## FUNCTION

With supply voltage applied to terminals A1/A2, relays K3 and K4 (terminals 37/38) start with the pre-selected ON-delay time. The ON-delay time  $t_{A1}$  can be adjusted infinitely in the range 0.15 to 3 s or 1.5 to 30 s according to the device type. The device is enabled by pressing the reset button. The following operating modes can be selected:

- **Manual start** – The reset button must be connected to S34 through terminal S33. For starting the relay, the reset button must be pressed. Relays K3 and K4 (terminals 37/38) will switch into the OFF position. With the falling edge of the reset signal, the reset is completed and activates relays K1 and K2, which become self-locking after the response time  $t_{A3}$ . After this switch-on phase, the 2 enabling current paths defined for the output are closed (terminals 13/14, 23/24). With the emergency stop command, the power supply to relays K1 and K2 is interrupted. The enabling current paths (terminals 13/14, 23/24) are immediately opened with release time  $t_R$ , and relays K3 and K4 will start after the pre-set ON-delay time  $t_{A1}$ , terminals 37/38. Three LEDs display the state of relays K1/K2, K3/K4 and the supply voltage.
- **Automatic start** – For monitoring of interlocking installations with locking mechanism or safety gate applications in which on automatic start shall be performed it is necessary to jumper terminals S33/S35. The device will react at the rising edge of input S12 that is internally connected to S33. Relays K3 and K4 (terminals 37/38) will switch into the OFF position. With the rising edge of input S12 the relay K1 is activated and response time  $t_{A2}$  started. When the time has elapsed, the 2 enabling current paths are closed (terminals 13/14, 23/24). With a stop command the power supply to relays K1 and K2 is interrupted. The enabling current paths (terminals 13/14, 23/24) are immediately opened with release time  $t_R$ , and relays K3 and K4 will start after the pre-set ON-delay time  $t_{A1}$ , terminals 37/38.

## OVERVIEW OF DEVICES

Type	Time range	Rated voltage	Terminals	Part no.	P.U.
SNV 4063KP-A	3 s	24 V DC	Screw terminals, pluggable	R1.188.0660.0	1
	30 s	24 V DC	Screw terminals, pluggable	R1.188.0680.0	1

TECHNICAL DATA	
Function	Emergency stop relay for access delay combined with locking mechanism
Function display	3 LEDs, green
Function mode / adjustment	Time / stepless
Adjustment range	0.15 - 3 s / 1.5 - 30 s
Power supply circuit	
Rated voltage $U_N$	A1, A2 24 V DC
Rated consumption	24 V DC 2.6 W
Operating voltage range $U_B$	0.85 - 1.1 x $U_N$
Electrical isolation supply circuit - control circuit	no
Control circuit	
Rated output voltage	S11, S33/S21 22 V DC
Input current / peak current	S12, S31/S22 25 mA / 100 mA
	S34, S35 40 mA / 50 mA
Response time $t_{A1} / t_{A2}$	30 ms / 700 ms
Minimum ON time $t_M$	200 ms
Recovery time $t_W$	500 ms
Release time $t_R$	25 ms
Release time $t_{R, \text{delayed contacts}}$ (tolerance)	0.15 - 3 s / 1.5 - 30 s ( $\pm 16\%$ )
Synchronous time $t_S$	500 ms
Permissible test pulse time $t_{TP}$	< 1 ms
Max. resistivity, per channel <sup>1)</sup>	$\leq (5 + (1.176 \times U_B / U_N - 1) \times 100) \Omega$
Output circuit	
Enabling paths	13/14, 23/24 normally open contact
	37/38 normally open contact, ON-delayed
Contact assignment	forcebly guided
Contact type	Ag-alloy, gold-plated
Rated switching voltage	enabling path 230 V AC
Max. thermal current $I_{th}$	enabling path 6 A
Max. total current $I^2$ of all current path	( $T_u = 55^\circ\text{C}$ ) 5 A <sup>2</sup>
Application category (NO)	AC-15 $U_e$ 230 V, $I_e$ 3 A
	DC-13 $U_e$ 24 V, $I_e$ 2 A
Short-circuit protection (NO), lead fuse / circuit breaker	6 A Class gG / melting integral < 100 A <sup>2</sup> s
Mechanical life	10 <sup>7</sup> switching cycles
General data	
Creepage distances and clearances between the circuits	EN 60664-1
Protection degree according to EN 60529 (housing / terminals)	IP40 / IP20
Ambient temperature / storage temperature	-25 °C - +55 °C / -25 °C - + 75 °C
Wire ranges screw terminals,	fine-stranded / solid 1 x 0.2 mm <sup>2</sup> - 2.5 mm <sup>2</sup> / 2 x 0.2 mm <sup>2</sup> - 1.0 mm <sup>2</sup>
	fine-stranded with ferrules 1 x 0.25 mm <sup>2</sup> - 2.5 mm <sup>2</sup> / 2 x 0.25 mm <sup>2</sup> - 1.0 mm <sup>2</sup>
Permissible torque	0,5 - 0,6 Nm
Wire ranges push-in terminals	1 x 0.25 mm <sup>2</sup> - 1.5 mm <sup>2</sup>
Weight	0.20 kg
Standards	EN ISO 13849-1, EN 62061, EN 50156-1
Approvals	TÜV, cULus Listed, CCC

# SNV 4274SL / SNV 4074ST – MONITORING OF EMERGENCY STOP, LIGHT BARRIERS AND SAFETY GATES, OFF-DELAYED/ON-DELAYED

## APPLICATIONS

- Monitoring of limit values in the process industry
- Monitoring of emergency stop applications
- Monitoring of safety gates
- Monitoring of interlocks
- Monitoring of light barriers

## SAFETY LEVEL

- Up to PL e / Category 4 (EN ISO 13849-1)
- Up to SIL<sub>CL</sub> 3 (EN 62061)

## FEATURES

- Continuously adjustable, analog time setting
- Time ranges 3s, 30s or 300s
- Retriggering of the time delay possible
- Single-channel or two-channel control
- Manual or automatic start
- SafeStart
- Cross monitoring

## OFF-DELAY WITH RETRIGGERING FUNCTION (SNV 4274SL)

After the supply voltage is applied to terminals A1/A2 and the safety inputs are closed, the contacts are switched on immediately, either automatically or by pressing the reset button (manual start). When the safety inputs are opened/de-energized, the contacts are switched off immediately or with a release delay.

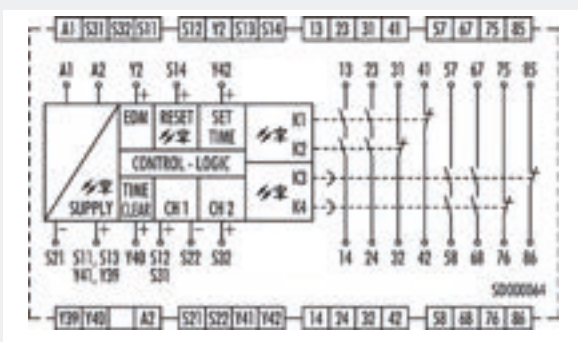

The set release delay only expires if the safety inputs are opened longer than the release delay set on the device. If the safety inputs are closed again before the release delay has expired (retriggering), the delayed contacts will remain closed, too.

## ON-DELAY FUNCTION (SNV 4074ST)

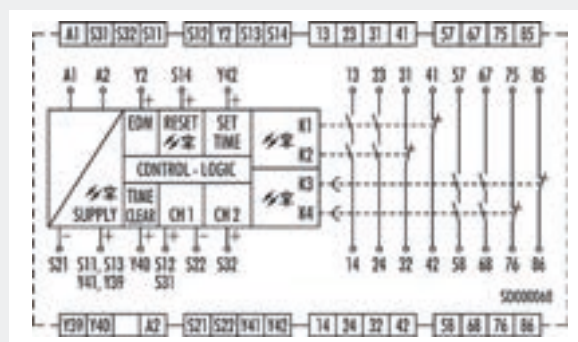

After the supply voltage is applied to terminals A1/A2 and the safety inputs are closed, the contacts are switched on immediately or with a response delay, either automatically or by pressing the reset button (manual start). When the safety inputs are opened/de-energized the contacts are switched off immediately.

## CONTACT EXPANSION

© **Wieland** US

### APPLICATIONS

- Duplication of the enabling current paths of a basic device
- Contact expansion in safety-oriented systems

### SAFETY LEVEL

- Up to PL c / Category 2 (EN ISO 13849-1)\*
- Up to SIL<sub>CL</sub> 1 (EN 62061)\*

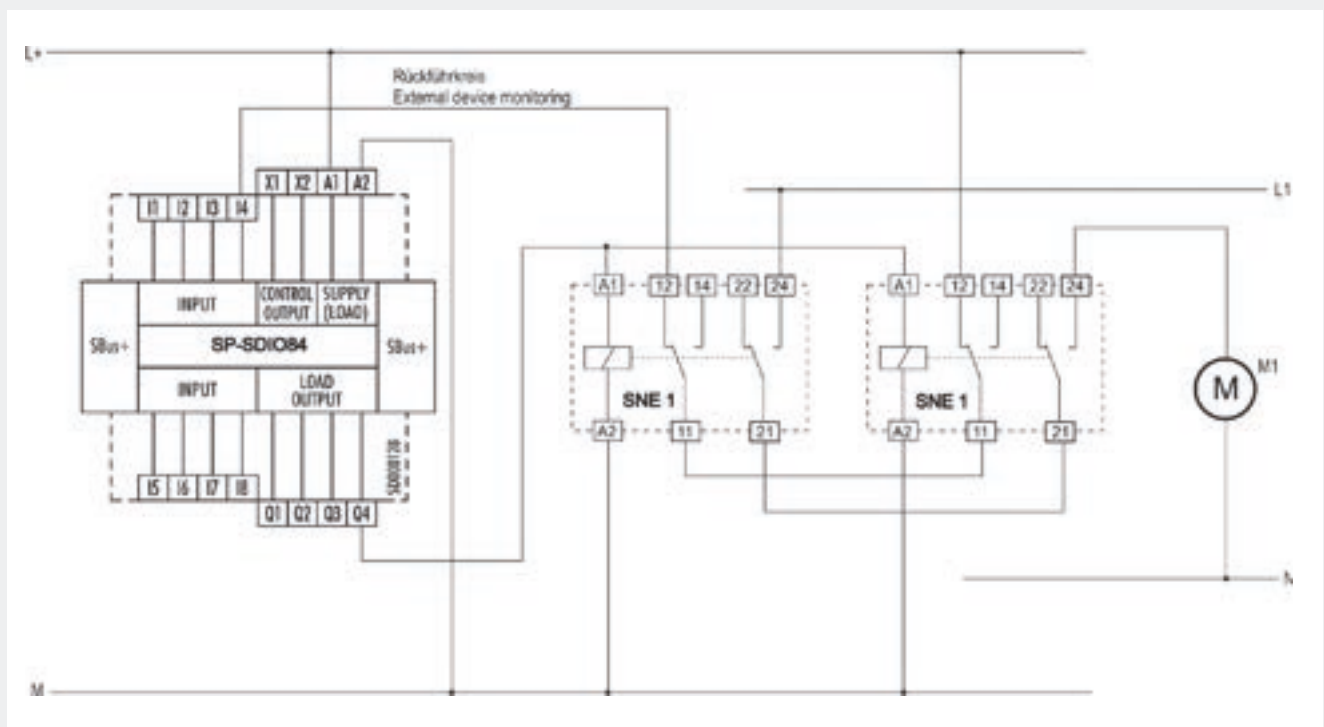

### FEATURES

- Stop Category 0 and 1 according to EN 60204-1
- Single-channel operation
- 2 changeover contacts (positively driven)
- Sturdy retaining bracket

\* Use up to PL e / category 4 possible (depending on the application and the category of the basic device or the safety control).

# SNE 4004K

## CONTACT EXPANSION

### APPLICATIONS

- Expansion of a basic device's enabling current paths
- Contact expansion in safety equipment

### SAFETY LEVEL

- Up to PL d / Category 3 (EN ISO 13849-1)\*
- Up to SIL<sub>CL</sub> 2 (EN 62061)\*

### FEATURES

- Stop Category 0 and 1 according to EN 60204-1 (see "Function")
- Single-channel or two-channel control
- SNE 4004K:
  - 4 enabling current paths, undelayed (NO contact)
  - 3 signaling current paths, undelayed (NC contact)

\* Depends on the category of the basic device or the safety control.

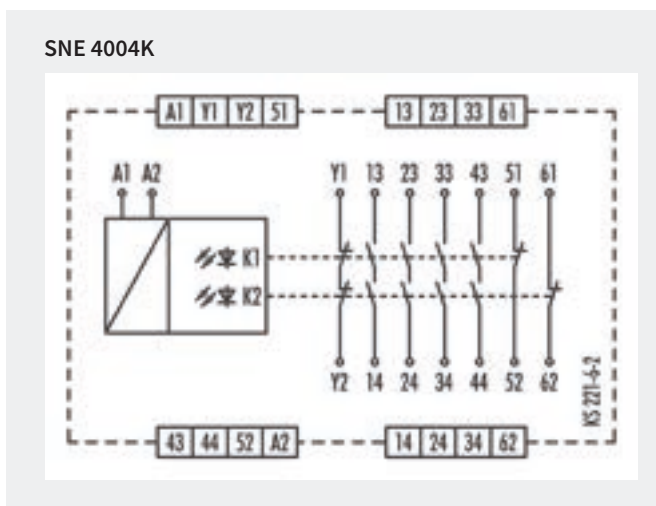

### FUNCTION

#### SNE 4004K

Supply voltage to the SNE devices is routed via an enabling current path of a basic device. When the supply voltage is applied relays K1 and K2 switch into the ON position. After this switch-on phase the four enabling current paths 13/14, 23/24, 33/34, 43/44 are closed and the feedback current path Y1/Y2 is open. This is displayed through two LEDs that are assigned to relays K1 and K2.

When the enabling current paths of the basic device are opened through the operation of the emergency stop button, relays K1 and K2 on the SNE 4004K switch back into the OFF-position. The enabling current paths open and the feedback current path closes. Feedback current path Y1/Y2 prevents the basic device from switching on again before K1 or K2 releases.

Rated frequency	50 - 60 Hz	
Operating voltage range $U_B$	0.85 - 1.1 x $U_N$	
Electrical isolation supply circuit - control circuit	non	
Control circuit		
Input current / peak current	A1, A2	65 mA / 1800 mA
Response time $t_{A1}$ / $t_{A2}$	20 ms	
Minimum ON time $t_M$	0,15 x $t_R$	
Recovery time $t_W$	≤ 200 ms	
Release time $t_R$	40 ms	
Release time $t_R$ , delayed contacts (tolerance)	0.5 s / 1 s / 2 s / 3 s (± 35 %)	
Max. resistivity, per channel <sup>1)</sup>	≤ (2.5 + (1.176 x $U_B$ / $U_N$ - 1) x 50) Ω	
Output circuit		
Enabling paths	13/14, 23/24, 33/34, 43/44	normally open contact
Signaling paths	51/52, 61/62	normally closed contact
Contact assignment	forcebly guided	
Contact type	Ag-alloy, gold-plated	
Rated switching voltage	enabling / signaling path	230 V AC
	Y1/Y2	230 V AC
Max. thermal current $I_{th}$	enabling / signaling path	6 A / 2 A
	Y1/Y2	2 A
Max. total current $I^2$ of all current path	( $T_u = 55$ °C)	9 A <sup>2</sup>
Application category (NO)	AC-15   DC-13	$U_e$ 230 V, $I_e$ 5 A   $U_e$ 24 V, $I_e$ 5 A
Short-circuit protection (NO), lead fuse / circuit breaker	6 A class gG / melting integral < 100 A <sup>2</sup> s	
Mechanical life	10 <sup>7</sup> switching cycles	
General data		
Creepage distances and clearances between the circuits	EN 60664-1	
Protection degree according to EN 60529 (housing / terminals)	IP40 / IP20	
Ambient temperature / storage temperature	-25 °C - +55 °C / -25 °C - + 75 °C	
Wire ranges screw terminals,	fine-stranded / solid	1 x 0.2 mm <sup>2</sup> – 2.5 mm <sup>2</sup> / 2 x 0.2 mm <sup>2</sup> – 1.0 mm <sup>2</sup>
	fine-stranded with ferrules	1 x 0.25 mm <sup>2</sup> – 2.5 mm <sup>2</sup> / 2 x 0.25 mm <sup>2</sup> – 1.0 mm <sup>2</sup>
Permissible torque	0,5 - 0,6 Nm	
Wire ranges push-in terminals	1 x 0.25 mm <sup>2</sup> – 1.5 mm <sup>2</sup>	
Weight	0.20 kg	
Standards	EN ISO 13849-1, EN 62061	
Approvals	DGUV, cULus Listed, CCC	

<sup>1)</sup> If two-channel devices are installed as single channel, the value is halved.

# SNE 4024K

## CONTACT EXPANSION

### APPLICATIONS

- Expansion of a basic device's enabling current paths
- Contact expansion in safety equipment

### SAFETY LEVEL

- Up to PL e / Category 4 (EN ISO 13849-1)\*
- Up to SIL<sub>CL</sub> 3 (EN 62061)\*

### FEATURES

- Stop Category 0 and 1 according to EN 60204-1 (see "Function")
- Single-channel control
- 2x2 enabling current paths (NO contact)

\* Depends on the category of the basic device or the safety control.

### FUNCTION

Once the supply voltage has been applied to terminals B1/A2 (B2/A2), the enabling current paths (NOC) are automatically closed and the signaling current paths (NCC) are opened.

When the supply voltage is ceased, the enabling current paths (NOC) are immediately opened and the signaling current paths (NCC) are immediately closed.

# SENSOR PRO – SAFE SENSORS

---

## SAFE ROTARY ENCODERS

---

### SENC Series

Safe rotary encoders for functional safety capture information about drive shaft position and angle in the form of increments. They offer users a higher resolution, simpler mounting and a more rugged construction than proximity sensors. Our safe rotary encoders offer redundancy and high diagnostic coverage, which the standard encoders are unable to realize, and hence achieve Kat 4, PL e und SIL 3.

## LIGHT CURTAINS + LIGHT GRIDS

---

### Safety light curtains – SLC Series

SLC series safety light curtains are ideal for realizing optoelectronic protective devices. The SLC series is used to safeguard hazard points, for area protection or access protection.

### Safety light curtains – SLD Series

SLD series safety light grids are optoelectronic personal protective devices for access protection at hazard points on plant and machinery.

## EMERGENCY STOP BUTTONS

---

### SNH Series

SNH series emergency stop buttons ensure the safety of man and machine, and offer the user a rugged and reliable design.

The quick and simple mounting of the emergency stop buttons saves time and money and the use of the highest-quality materials guarantees a long service life and reliable operation.

SNH series emergency stop buttons are suitable for numerous cross-sectoral applications.

## CONTACTLESS SWITCHES

### Non-contact safety switches – STS Series

The non-contact RFID safety switches of the STS series have the highest level of manipulation protection and are used to monitor the position of guards.

### Magnetic safety switches – SMA Series

SMA series sensors are magnetic safety sensors and are used for contactless safety door and position monitoring. They have integrated manipulation protection and can be used up to IP67.

## MECHANICAL SWITCHES

### Safety switches with guard control – SIN Series

SIN series safety switches are used for the position monitoring of movable guards and prevent the unintentional opening of safety doors and flaps via the integrated guard control. Typical fields of application are machines with coasting movements, at which access is allowed to be granted only when the hazard has been eliminated.

### Safety switches with separate actuator – SMS Series

SMS series safety switches are used for monitoring movable guards. They are suitable for both personal protection and process protection and available in three different versions.

## SAFE POSITION SWITCHES

### SLS Series

SLS series switches can be used for safe position monitoring. The switches can be actuated either by plunger or plastic roller.

# SERIES SENC

## SAFE HTL INCREMENTAL ENCODER

**SENC-58H WITH HOLLOW SHAFT**

**SENC-58S WITH SOLID SHAFT**

### APPLICATIONS FOR SAMOS® PRO MOTION

- Safe Rotational speed, rotational direction or position monitoring to EN/IEC 61800-5-2
- Shutdown monitoring for commissioning or maintenance
- Safe direction detection (SDI) for rolls, gates or machines
- Safely reduced speed (SLS) for setup mode
- Safely limited position (SLP) for rotative or linear axes

### FEATURES

- Rotational speed or position monitoring to SIL 3 and PL e, for 1 axis, and up to SIL 2 and PL d for 2 axes
- Special form fit with the positive lock for hollow shafts
- Compact 58 flange size with minimum space requirement inside the machine
- Flexible mounting with hollow shaft, solid shaft or axial connector
- Compatible HTL output for fast safe inputs on samos® PRO MOTION
- Resolutions from 360 ppr and 1024 ppr depending on accuracy requirement
- PUR encoder cable resistant to oil, UV, ozone and solvents
- Over 100,000 hours of service life from mounting at hollow shaft encoder
- Maximum peak speed of 9000 rpm and continuous speed of 4000 rpm

## SAFE HTL INCREMENTAL ENCODER

### TYPICAL ARCHITECTURE

The integration of encoders for speed monitoring in a safety loop is possible in various configurations. Various solutions, depending on the existing safety level and/or existing equipment, are presented below.

### NOTE

The use of encoders in a safety loop requires external monitoring of the encoder signals. The safety modules offered by Wieland meet these requirements in a manner that is transparent for the user.

### STANDARD INSTALLATION WITHOUT SIL CERTIFICATION

## SAFE HTL INCREMENTAL ENCODER

TECHNICAL DATA		
Function	SENC-58Sxx	SENC-58Hxx
Incremental rotary encoder	Logging of position or angle changes via rectangular pulses with photoelectric sensing	
Nominal voltage $U_N$	24 V DC	
Operating voltage range $U_B$	11 – 30 V DC	
Galvanic isolation supply circuit - output circuit	No	
Supply current	100 mA without load	
Electrical data		
Output signals	Digital HTL signals (11-30 V DC)	
PIN coding	A, A/, B, B/ for safe incremental pulses 0, 0/ for index pulse (no internal plausibility check)	
Color coding of encoder cable (CABLE-M23CCW...)	A: gray, A/: pink, B: brown, B/: green, 0: red, 0/: black, +V: blue and green/brown, 0V: white and white/green	
Resolution	360 ppm and 1024 ppm	
Current per channel pair	40 mA	
Short circuit strength	Yes	
Protection against polarity reversal	Yes	
Mechanical data		
DIN-size	58 mm	
Shaft type	Solid shaft	Hollow shaft
Shaft diameter	1000 mm	14 mm
Housing material	Powder-coated, die-cast zinc	
Flange material	Aluminum	
Shaft material	AISI 303 stainless steel	
Bearing	6800 series – sealed	6803 series – sealed
Maximum loads	Axial: 40 N, radial: 80 N	Axial: 20 N, radial: 40 N
Shaft moment of inertia	< 2800 g/mm <sup>2</sup>	< 9500 g/mm <sup>2</sup>
Static/dynamic torque	5 / 35 mN/m	10 / 85 mN/m
Max. peak rotational speed	9000 rpm	9000 rpm
Max. continuous rotational speed	6000 rpm	4000 rpm
Theor. mechanical service life*	> 29.7/10 <sup>9</sup> revolutions / 82,365 hours	> 24/10 <sup>9</sup> revolutions / 100,000 hours
Weight (approx.)	0.300 kg	0.280 kg
General data		
Protection class as per DIN 60529	IP65	
Ambient temperature / storage temperature	-25°C – +85°C / -20°C – +85°C	
Standards	EN/ IEC 61508, IEC 13849-1, IEC 61800-5-2, IEC 62061	
Approvals	CE, TÜV, cULus listed	

\* continuous max. rotational speed – ½ max. load – to ISO 281:1990, L10

## ACCESSORIES FOR ROTARY ENCODER LINE

**Rotary encoder**

**Torque support with retaining bracket**

**Torque support with stator coupling**

Torque supports offer a high degree of rotatory stability, preventing the encoder rotating along with the shaft. Flange adapters are used to mount the encoder on a motor. The reducing bushes allow you to reduce the diameter of a hollow shaft encoder. The encoder cables from PUR with M23 connector (encoder side) and open core (controller side) offer high flexibility, ruggedness and durability.

## Rated for maximum ruggedness and optimized safety

Safe drive with keyed joint.

A unique device for continuous hollow shafts, which effectively prevents slippage through locking pins.

Rugged mechanical design with additional bearing in the cover.

### OVERVIEW OF DEVICES

Type	Description	Part. no.	P.U.
<b>ACCESSORIES: COUPLING</b>			
COUP-STATOR-58-S	Stator coupling, size 58mm, stainless-steel	R1.450.9110.0	1

CABLE-M23CKW-PUR-050	Encoder cable, 5 m, PUR, shielded	R1.450.9320.0	1
CABLE-M23CKW-PUR-070	Encoder cable, 7 m, PUR, shielded	R1.450.9324.0	1
CABLE-M23CKW-PUR-100	Encoder cable, 10 m, PUR, shielded	R1.450.9330.0	1
CABLE-M23CKW-PUR-150	Encoder cable, 15 m, PUR, shielded	R1.450.9335.0	1
CABLE-M23CKW-PUR-200	Encoder cable, 20 m, PUR, shielded	R1.450.9340.0	1

The fault elimination of the mechanic is not part of the device and has to be provided by the operator. For additional information (e.g. drawings and dimensions), visit the eShop at <http://eshop.wieland-electric.com>

# SERIES SLC4

## SAFETY LIGHT CURTAIN

### APPLICATIONS

- Access protection (finger and hand protection)
- Monitoring of access points and hazardous areas
- Vertical and horizontal protection

### SAFETY LEVEL

- Up to PL e / Category 4 (EN ISO 13849-1)
- Up to SIL<sub>CL</sub> 3 (EN 62061)

### FEATURES

- Safety light curtain AOPD type 4
- Beam resolution 14 and 30 mm
- Protection field heights from 300 up to 2100 mm
- Standardized connection technology (M12)
- Ranges up to 30 m can be implemented
- Base and Standard-Muting variants available
- One package: SLC4-Sets incl. brackets and pigtail (M12 connection)
- Accessories for installation, mounting and muting optional available

### MAXIMUM SAFETY AT HIGHEST EFFICIENCY

SLC4 is ideally suited for finger and hand protection to monitor safe access to machines, while ensuring high availability and reducing downtimes of the machines. The two different variants Base and Standard-Muting can solve standard as well as more complex applications, including muting-applications. Since all variants are based on the same platform, SLC4 can easily be replaced, e.g. for adaptations or retrofit at machines.

### BENEFITS

- Configuration without software
- Zero dead zone
- All models are based on the same platform
- Clearly visible LEDs for on-site diagnostic
- Protective field heights from 300 up to 2100 mm
- Easy and fast installation without programming (Plug&Play for Base models)
- Space saving installation and flexible integration in the machine
- Easy replacement without design changes + reduced number of required accessories
- Fast on-site diagnostic to reduce downtimes of the machine
- Suitable devices for almost every application

Access protection with the safety light curtain SLC4

**Further information on the muting types and the associated product accessories can be found on page 8-11!**

# SERIES SLG4

## SAFETY LIGHT GRID

### RELIABLE AND COST-EFFICIENT ACCESS PROTECTION AT HAZARDOUS AREAS

Whenever large areas at machine or on the production floor need reliable and safe access protection SLG4 series is the perfect choice. Ranges up to 70 m can be implemented with only one single system. The robust housing made of aluminum and the mechanical protection of IP67 in accordance with EN 60529 allow highest functional safety even under harsh environment conditions.

### BENEFITS

- Configuration without software
- Robust design, operating temperature -30°C up to +50°C and protection degree IP67
- Finger/hand/body models are based on the same platform
- Clearly visible LEDs for on-site diagnostic
- Emitter, receiver, brackets and pigtail (already connected) included in package

### APPLICATIONS

- Access and entry/exit protection (personal protection)
- Safeguarding of hazardous areas (long distances)

### SAFETY LEVEL

- Up to PL e / Category 4 (EN ISO 13849-1)
- Up to SILCL 3 (EN 62061)

### FEATURES

- Safety light grids AOPD type 4
- 2-, 3- and 4-beam systems
- Protection field heights from 500 up to 1200 mm
- Standardized connection technology (M12)
- Ranges up to 70 m can be implemented
- Base and Standard-Muting variants available
- One package: SLG4-Sets incl. brackets and pigtail (M12 connection)
- Accessories for installation, mounting and muting optional available

### Standard M12 Connector for easy installation

- Easy and fast installation without programming (Plug&Play for Base models)
- Reliable and safe use even under harsh environmental conditions
- Easy replacement without design changes + reduced number of required accessories
- Fast on-site diagnostic to reduce downtimes of the machine and easy alignment of safety light grid
- Reduced assembly work and fast commissioning

## SAFETY LIGHT GRID

TECHNICAL DATA		
Function	safety light curtain	
Function display	LED	
Power supply circuit		
Power supply $U_N$	24 Vdc $\pm$ 20%	
Current consumption (transmitter)	3.5 W max	
Current consumption, no load (receiver)	5.5 W max (without load)	
Operating voltage range $U_B$	0,8 - 1,2 x $U_N$	
Electrical isolation supply circuit-control circuit	no	
Protection field data	Resolution	Range / protective field height
	Body Short Range	0.5 - 15 m/ 500, 800, 900, 1.200 mm
	Body Long Range	5.0 - 70 m/ 500, 800, 900, 1.200 mm
Output circuit OSSD		
Number	2	
Type	PNP	
Short circuit and cross circuit monitoring	Yes	
Switching current (max., per output)	250 mA (500 mA total max current)	
Leakage current (max.)	< 1 mA	
Switching voltage, high active ( $U_B - 1V$ )	18.0 - 27.0 V	
Output voltage - ON min	Power supply value less 1 V	
Output voltage - OFF max	0.2 V	
Output capacitive load	1 $\mu$ F at 24 Vdc	
Line resistance / line length	< 4 $\Omega$ / $\leq$ 30 m	
Response time	from 12 to 15 ms (uncoded)	
Optical data		
Light source	Infrared LED (850 nm wavelength)	
EAA angle	< $\pm$ 2.5° at 3 meters	
Ambient light rejection	EN 61496-2-2020	
General data		
Protection degree according to EN 60529 (mechanical protection)	IP67, IP65	
Electrical protection	Class III	
Pollution degree	2	
Operating temperature	-30...+55 °C	
Storage temperature	-30...+60 °C	
Connection	M12.5; 8 poles (depending on the model)	
Cable length (max.)	30 m	
Weight	1.4 Kg/mt (single bar - without package)	
Vibrations	10 mm / 3g, 5 to 150 Hz frequency, (EN 60068-2-6 / Class 3M7 IEC TR 60721-4-3)	
Shock resistance	25g x 6 ms x 600 (EN 60068-2-27 / Class 3M7 IEC TR 60721-4-3)	
Housing material	Painted aluminum (yellow RAL 1003)	
Caps material	PBT Valox 553 black	
Caps cover material	PBT 1403g3 black	
Frontal cover material	MAKROLON AR 7099 Clear	
Standards	EN 61496, EN ISO 13849-1, EN 62061, EN 61508	
Approvals	CE, TÜV, UKCA, cULus Listed	
Safety related data		
PL (EN ISO 13849-1)	up to PL e (ref. EN ISO 13849-1: 2015)	
Category (EN ISO 13849-1)	up to Cat. 4 (ref. EN ISO 13849-1: 2015)	
SIL (IEC 61508)	up to SIL 3 (ref. EN 61508)	
SILCL (EN IEC 62061)	up to SIL CL 3 (ref. EN 62061:2005/A2: 2015)	
Type (EN IEC 61496)	Type 4 (ref. EN 61496-1: 2020)

### BASE

Type	Protective Field Height [mm]	Description	Part. no.	P.U.
SLG4-B2-0500	0500	Safety Light Grid Transmitter + Receiver, 2 beams, range up to 70 m	R1.620.0500.0	1
SLG4-B3-0800	0800	Safety Light Grid Transmitter + Receiver, 3 beams, range up to 70 m	R1.620.0800.0	1
SLG4-B4-0900	0900	Safety Light Grid Transmitter + Receiver, 4 beams, range up to 70 m	R1.620.0900.0	1
SLG4-B4-1200	1200	Safety Light Grid Transmitter + Receiver, 4 beams, range up to 70 m	R1.620.1200.0	1

### STANDARD MUTING

Type	Protective Field Height [mm]	Description	Part. no.	P.U.
SLG4-SM2-0500	0500	Safety Light Grid Transmitter + Receiver, 2 beams, range up to 70 m	R1.621.0500.0	1
SLG4-SM3-0800	0800	Safety Light Grid Transmitter + Receiver, 3 beams, range up to 70 m	R1.621.0800.0	1
SLG4-SM4-0900	0900	Safety Light Grid Transmitter + Receiver, 2 beams, range up to 70 m	R1.621.0900.0	1
SLG4-SM4-1200	1200	Safety Light Grid Transmitter + Receiver, 2 beams, range up to 70 m	R1.621.1200.0	1

Further information on the muting types and the associated product accessories can be found on page 84-87!

# SERIES SLC4 + SLG4

## MUTING TYPES

### CROSS MUTING (2-SENSOR-MUTING)

Material movement possible in both directions.  
Simultaneous activation of the muting sensors.

### L-MUTING (2-SENSOR-MUTING)

Material movements only possible  
from hazardous area.  
Successive activation of the muting  
sensors.  
Well suited for space saving applications.

### T-MUTING (4-SENSOR-MUTING)

Material movement possible in both directions.  
Successive activation of the muting sensors.  
If the beams of the muting sensors cannot cross,  
e.g. with highly reflective material surfaces.

# SERIES SLC4 + SLG4

## APPLICATION EXAMPLES

### MUTING WITH SLG4

Safety light grids SLG4 Standard Muting with 2-sensor-muting at a packaging machine.

### SLG4 – MUTING FUNCTIONS WITH SAMOS® PRO COMPACT

Safety Light Grids SLG4 and Safety Light Curtains SLC4 are ideally suited for monitoring material locks, such as in the packaging industry, in combination with the freely configurable muting function blocks of samos® PRO.

# SERIES SLC4 + SLG4

## APPLICATION EXAMPLES

### PRESENCE DETECTION VIA CASCADING OF SLC4

A vertically Safety Light Curtain SLC4 is used to protect the operator from the hazardous movement of the machine. In addition, presence detection is enabled with a horizontally mounted second SLC4. Both SLC4 Safety Light Curtains are connected via cascading function.

### POINT OF OPERATING GUARDING

Point of operating guarding for hand and finger protection is typically the most common application for SLC4 series Base and Standard Muting.

### ACCESS GUARDING ON A PRODUCTION LINE

Safety Light Curtains SLC4 with up to 30 mm resolution can be used for access guarding into danger zones. SLC4 detect people upon entry into the danger zone.

# SERIES SLC4 + SLG4

## ACCESSOIRES

### MOUNTING

Type	Description	Part. no.	P.U.
SLX4-AC-LP	Laser alignment aid (external), battery-powered	R1.690.0001.0	1
SLX4-MO-RB	Rotative Bracket Set, 4 pcs	R1.690.0005.0	1
SLX4-AC-TB14	Test Bar Finger Protection, 14 mm Resolution	R1.690.0032.0	1
SLX4-AC-TB30	Test Bar Hand Protection, 30 mm Resolution	R1.690.0033.0	1
SLX4-MO-AVK	Shock absorber for Mounting L-Bracket Set, 4 pcs	R1.690.0040.0	1
SLX4-MO-LB	Mounting L-Bracket Set, 4 pcs	R1.690.0041.0	1

### INSTALLATION CABLES

Type	Description	Part. no.	P.U.
SLX4-AC-CC1	Cascade Cable 1m	R1.690.0002.0	1
SLX4-AC-CC3	Cascade Cable 3m	R1.690.0003.0	1
SLX4-AC-CC10	Cascade Cable 10m	R1.690.0004.0	1
SLX4-AC-RP-5	Replacement Plug Base, Connector M12 5-poles	R1.690.0014.0	1
SLX4-AC-RP-5-5	Replacement Plug Standard Muting, Female and Male Connector M12 5-poles	R1.690.0017.0	1
SLX4-AC-RP-8-5	Replacement Plug Standard Muting, Female Connector M12 5-poles and Male Connector M12 8-poles	R1.690.0018.0	1
SLX4-AC-SP	Screw Plug	R1.690.0039.0	1

### CONNECTION CABLES

Type	Description	Part. no.	P.U.
SLX-CAB-M12-S0505	Connection cable M12, 5-pole, length 5m, shielded	R1.600.0505.0	1
SLX-CAB-M12-S0510	Connection cable M12, 5-pole, length 10m, shielded	R1.600.0510.0	1
SLX-CAB-M12-S0515	Connection cable M12, 5-pole, length 15m, shielded	R1.600.0515.0	1
SLX-CAB-M12-S0525	Connection cable M12, 5-pole, length 25m, shielded	R1.600.0525.0	1
SLX-CAB-M12-S0550	Connection cable M12, 5-pole, length 50m, shielded	R1.600.0550.0	1
SLX-CAB-M12-S0805	Connection cable M12, 8-pole, length 5m, shielded	R1.600.0805.0	1
SLX-CAB-M12-S0810	Connection cable M12, 8-pole, length 10m, shielded	R1.600.0810.0	1
SLX-CAB-M12-S0815	Connection cable M12, 8-pole, length 15m, shielded	R1.600.0815.0	1
SLX-CAB-M12-S0825	Connection cable M12, 8-pole, length 25m, shielded	R1.600.0825.0	1
SLX-CAB-M12-S0850	Connection cable M12, 8-pole, length 50m, shielded	R1.600.0850.0	1
SLX-CAB-M12-0505	Connection cable M12, 5-pole, length 5m, unshielded	R1.500.0505.0	1
SLX-CAB-M12-0510	Connection cable M12, 5-pole, length 10m, unshielded	R1.500.0510.0	1
SLX-CAB-M12-0515	Connection cable M12, 5-pole, length 15m, unshielded	R1.500.0515.0	1
SLX-CAB-M12-0525	Connection cable M12, 5-pole, length 25m, unshielded	R1.500.0525.0	1
SLX-CAB-M12-0550	Connection cable M12, 5-pole, length 50m, unshielded	R1.500.0550.0	1
SLX-CAB-M12-0805	Connection cable M12, 8-pole, length 5m, unshielded	R1.500.0805.0	1
SLX-CAB-M12-0810	Connection cable M12, 8-pole, length 10m, unshielded	R1.500.0810.0	1
SLX-CAB-M12-0815	Connection cable M12, 8-pole, length 15m, unshielded	R1.500.0815.0	1
SLX-CAB-M12-0825	Connection cable M12, 8-pole, length 25m, unshielded	R1.500.0825.0	1
SLX-CAB-M12-0850	Connection cable M12, 8-pole, length 50m, unshielded	R1.500.0850.0	1

### MUTING

Type	Description	Part. no.	P.U.
SLX4-MUT-TMC	Muting Cable for T-Muting, M12 4-poles	R1.690.0006.0	1
SLX4-MUT-LMC	Muting Cable for L-Muting, M12 4-poles	R1.690.0007.0	1
SLX4-MUT-SETCAT	Muting-Sensor-Set T-Muting, incl. 4 Active and Passive Arms with pre-assembled Sensors and Reflectors	R1.690.0008.0	1
SLX4-MUT-SETCAL	Muting-Sensor-Set L-Muting, incl. 4 Active and Passive Arms with pre-assembled Sensors and Reflectors	R1.690.0009.0	1
SLX4-MUT-CONBOX	Muting Connection Box for Muting-Sensors, 4 Connection Sockets	R1.690.0010.0	1
SLX4-MUT-MOUNTKIT	Mounting Set for Muting Connection Box	R1.690.0011.0	1
SLX4-MUT-SET2P	Muting-Sensor-Set for Cross-Muting including 2 Passive and 2 Active Arms, adjustable, pre-assembled	R1.690.0034.0	1
SLX4-MUT-SET4S	Muting-Sensor-Set for Cross-Muting including 2 Passive and 2 Active Arms, adjustable, pre-assembled	R1.690.0035.0	1
SLX4-MUT-SET2BL	Muting-Sensor-Set for L-Muting including 1 Passive and 1 Active Arms, adjustable, pre-assembled, left sided	R1.690.0036.0	1
SLX4-MUT-SET2BR	Muting-Sensor-Set for L-Muting including 1 Passive and 1 Active Arms, adjustable, pre-assembled, right sided	R1.690.0037.0	1
SLX4-MUT-REFLEX	Replacement Reflector for Muting-Sensor-Sets	R1.690.0038.0	1

# SERIES SLC

## SAFETY LIGHT CURTAIN

### FUNCTIONS SUITABLE FOR EVERY PROTECTION TASK

All important contactless safety functions on machines and equipment can be realized by means of the two function versions, Standard and Professional of the SLC series.

### ADVANTAGES

#### HIGHER EQUIPMENT AVAILABILITY

- Easy adjustment and stable operation through slim and rigid housing
- Parameterization without PC or DIP switch through simple wiring in the control cabinet
- The integrated Double-Scan technology avoids unwanted shutdown even in harsh operating conditions
- Clear diagnostic and status messages in the 7-segment display ensure shorter downtimes
- Cable lengths up to 100 m with unshielded connection cables ensure greater operational flexibility and reduce costs even under difficult EMC conditions

### APPLICATIONS

- Access protection (finger, hand and arm protection)
- Access security (personal protection)
- Horizontal zone protection

### SAFETY LEVEL

- Up to PL e / Category 4 (EN ISO 13849-1)
- Up to SIL<sub>CL</sub> 3 (EN 62061)

### FEATURES

- Safety light curtain AOPD type 4
- Beam resolution 14, 20, 30 and 40 mm
- Protection field heights 300 – 1800 mm
- Extensive accessories

With 3-Zone alignment indication

### FASTER DURING COMMISSIONING, OPERATION AND SERVICE

- The 3-zone alignment indicator reduces assembly time and simplifies jutage
- The wide range of SLC products permits optimal and cost-effective design of protective devices
- Easy to connect via standard M12 connection technology
- Fast installation and removal on the machine through a system configuration in the control cabinet
- Selectable transmission channels and range reduction prevent mutual interference
- Simplified planning of safeguards because every SLC safety light curtain can be used from 0 m to the respective maximum range

Finger, hand and arm protection on machines with the safety light curtain SLC

# SERIES SLD

## SAFETY LIGHT GRID

### APPLICATIONS

- Access security (personal protection)
- Safeguarding of hazardous areas

### SAFETY LEVEL

- Up to PL e / Category 4 (EN ISO 13849-1)
- Up to SIL<sub>CL</sub> 3 (EN 62061)

### FEATURES

- Safety light grid AOPD type 4
- 2-, 3- and 4-beam resolutions
- Available as transmitter-receiver or transceiver systems
- High ranges up to 70 m can be implemented
- Extensive accessories

### PERSONAL PROTECTION FUNCTION

The SLD safety light grids are especially suitable for the contactless safeguarding of hazardous areas and for personal protection on machines and equipment.

If long ranges are also required for safeguarding, SLD safety light grids are an economical solution compared to other optoelectronic protective devices.

### ADVANTAGES

#### FASTER DURING COMMISSIONING, OPERATION AND SERVICE

- The integrated laser alignment aid (optional) permits precise mounting and reduces the startup times of the SLD system
- Parameterization without PC or DIP switch through simple wiring in the control cabinet
- Easy installation and diagnosis with the help of the 7-segment display
- Clearly visible status and muting indicators Enable remote diagnostics
- Plug & Play due to M12 connection technology

#### INCREASED RELIABILITY

- Robust aluminum housing in IP67
- Operating temperature range -30 °C to 55 °C permits implementation even in the harshest environments
- Multi-beam scanning avoids unwanted shutdown
- Mutual interference is avoided through the adjustable range reduction when implementing multiple systems
- Robust device columns with spring-loaded base mounting and integrated alignment aid are available for the free-standing implementation

← Integrated status and muting indicator

← Integrated laser alignment aid

## SAFETY LIGHT GRID

### SLD STANDARD

The safety light grid SLD Standard each consist of a transmitter and a receiver unit and are thus suitable for highest ranges

- 2-, 3- and 4-beam systems
- Ranges up to 70 m

	SLD Standard
LED display	●
Multi-scan technology	●
Range reduction	●
Laser alignment aid (optional)	●
Automatic start	●

### SLD UNIVERSAL – LESS CABLING EXPENDITURE

The safety light grids consist of an integrated SLD universal transmitter/receiver unit and a passive reflector unit without electrical connection.

- 2- and 3-beam systems
- Range up to 8 m

## SAFETY LIGHT GRID

TECHNICAL DATA		
Function		safety light grid
Function display		LED
Power supply circuit		
Rated voltage $U_N$		24 V DC
Current consumption (transmitter)		50 mA
Current consumption, no load (receiver/transceiver)		150 mA
Operating voltage range $U_B$		0.8 - 1.2 x $U_N$
Electrical isolation supply circuit - control circuit		no
Protection field data		
	Beams	Range (device-dependent)
	2	0.5 - 50 m / 20 - 70 m / 0.5 - 8 m
	3	0.5 - 50 m / 20 - 70 m / 0.5 - 6 m
	4	0.5 - 50 m / 20 - 70 m
Output circuit OSSD		
Number		2
Type		Transistor outputs PNP
Short-circuit monitoring		ja
Switching current (max., per output)		380 mA
Leakage current (max.)		200 $\mu$ A
Switching voltage, high active ( $U_B - 1V$ )		18.0 - 27.8 V
Switching voltage, low		0 - 2.5 V
Line resistance / line length		< 200 $\Omega$
Response time		25 ms
General data		
Creepage distances and clearances between the circuits		EN 60664-1
Protection degree according to EN 60529		IP67
Ambient temperature / storage temperature		-30 °C - +55 °C / -40 °C - + 75 °C
Connection		M12 (5 pole / 8 pole) device-dependent
Weight		1.4 - 2.2 kg, device-dependent
Standards		EN 61496, EN ISO 13849-1, EN 62061
Approvals		TÜV, c-CSA-us
Safety related data		
PL (EN ISO 13849-1)		up to PL e
Category (EN ISO 13849-1)		up to category 4
SIL (IEC 61508)		up to SIL 3
SIL <sub>cl</sub> (EN IEC 62061)		up to SIL <sub>cl</sub> 3
Type (EN IEC 61496)		Type 4
B <sub>10D</sub>		NA
PFH <sub>b</sub>		6.6 x 10 <sup>-9</sup> 1/h
T <sub>M</sub>		20 years

**Note:** For the connection of safety light grids SLD shielded cables are mandatory.

# SERIE SLD

## MUTING TYPES

### TIME-CONTROLLED 2-SENSOR MUTING

Material movements through the protective field possible in both directions.

Simultaneous activation of the muting sensors (within 4 s).

### SEQUENCE-CONTROLLED 2-SENSOR MUTING

Material movements only possible from hazardous area.

Successive activation of the muting sensors (within 8 h).

### TIME-CONTROLLED 4-SENSOR MUTING

Material movements through the protective field possible in both directions.

Successive activation of the muting sensors (within 4 s).

Use necessary if the beams of the muting sensors are not to cross, e.g., with highly reflective material surfaces.

# SERIE SLD

## APPLICATION EXAMPLES

Multi-sided safeguarding of a sheet metal processing machine by SLD safety light grids and SLD deflection mirrors.

Safety light grids SLD Universal-Professional with time-controlled 2-sensor-muting at a packaging machine.

### SLD – MUTING FUNCTIONS WITH SAMOS<sup>®</sup>PRO

SLD safety light grids are ideally suited for monitoring material locks, such as in the packaging industry, in combination with the freely configurable muting function blocks of samos<sup>®</sup>PRO, for example in the packaging industry.

SLD-4ST4-1-50	Receiver-Standard, 4 beams, range 50 m, laser alignment aid	R1.642.4150.0	1
SLD-4ST4-1-70	Receiver-Standard, 4 beams, range 70 m, laser alignment aid	R1.642.4170.0	1

### UNIVERSAL

Type	Description	Part. no.	P.U.
SLD-4US2-0-00	Universal-Standard, 2 beams	R1.644.2000.0	1
SLD-4US3-0-00	Universal-Standard, 3 beams	R1.644.3000.0	1
SLD-4UP2-0-00	Universal-Professional, 2 beams	R1.648.2000.0	1
SLD-4UP3-0-00	Universal-Professional, 3 beams	R1.648.3000.0	1
SLD-4UP2-2-00	Universal-Professional, 2 beams, muting lamp	R1.648.2200.0	1
SLD-4UP3-2-00	Universal-Professional, 3 beams, muting lamp	R1.648.3200.0	1
SLD-MIR2-0-08	Mirror, 2 beams, range 8 m	R1.606.2008.0	1
SLD-MIR3-0-06	Mirror, 3 beams, range 6 m	R1.606.3006.0	1
SLD-MIR3-0-08	Mirror, 3 beams, range 8 m	R1.606.3008.0	1

# SERIES SLC

## MOUNTING ACCESSORIES

SLX-MO-RO1

SLX-MO-RO2

The **SLX-MO-RO1** and **SLX-MO-RO2** swivel mount sets are used for wall mounting of the SLC series (360° horizontal orientation possible).

# SERIES SLD

## MOUNTING ACCESSORIES

SLX-MO-RO-SET1

SLX-MO-RO-SET2

The swivel mount set **SLX-MO-RO-SET1** (**SLX-MO-RO-SET1S** with shock absorber) is used for wall mounting of Transmitter, Receiver and Transceiver from series SLD (240° horizontal adjustment possible).

The swivel mount set **SLX-MO-RO-SET2** (**SLX-MO-RO-SET2S** with shock absorber) is used for wall mounting of Mirror from series SLD (240° horizontal adjustment possible).

### OVERVIEW OF DEVICES

Type	Description	Part no.	P.U.
SLX-MO-RO1	Rotative bracket 360°, 2 pcs., inkl. 1 pcs. SLC cylinder	R1.591.0006.0	1
SLX-MO-RO2	Rotative bracket 360°, 2 pcs., inkl. 1 pcs. SLC cylinder	R1.591.0020.0	1
SLX-MO-RO-SET1	Set with SLX-MO-RO-B + SLX-MO-RO-C + screws	R1.591.0011.0	1

## MOUNTING ACCESSORIES

SLX-MO-L

SLX-MO-TNUT

SLX-MO-Z

SLX-MO-CLIP

The **SLX-MO-TNUT** set including sliding blocks for mounting of series SLC/SLD.

The **SLX-MO-L** and **SLX-MO-Z** sets are used for wall mounting of series SLC/SLD in combination with sliding blocks SLX-MO-TNUT.

The **SLX-MO-CLIP** is used for fixed mounting of series SLC/SLD in device columns SLX-COL.

### OVERVIEW OF DEVICES

Type	Description	Part no.	P.U.
SLX-MO-L	L-Bracket, 2 pcs.	R1.591.0004.0	1
SLX-MO-Z	Z-Bracket, 2 pcs.	R1.591.0005.0	1
SLX-MO-TNUTM6	Set slot nut with M6-screw thread, 10 pcs.	R1.591.0001.0	1
SLX-MO-CLIP	Clamp bracket, for installation in device column	R1.591.0009.0	1
SLX-MO-CLIP2	Set clamp bracket, for installation in device column, 2 pcs.	R1.591.0010.0	1

# SERIES SLC / SLD

## MOUNTING ACCESSORIES

**SLX-CAB-M12**

### CONNECTION CABLES SLC/SLD

The connection cables **SLX-CAB-M12** (shielded and unshielded) are used for the electrical connection of series SLC/SLD by M12-connector (5- or 8-pole). For the connection of safety light grids SLD shielded cables are mandatory.

### OVERVIEW OF DEVICES

Type	Description	Part no.	P.U.
SLX-CAB-M12-S0505	Connection cable M12, 5-pole, length 5m, shielded	R1.600.0505.0	1

## DEVICE COLUMNS

SLX-COL

The device columns **SLX-COL** are used for a free-standing installation of series SLC/SLD.

### OVERVIEW OF DEVICES

Type	Description	Part no.	P.U.
SLX-COL-0900	Device column, profile height: 820 mm; total height: 900 mm	R1.593.0900.0	1
SLX-COL-1000	Device column, profile height: 980 mm; total height: 1060 mm	R1.593.1000.0	1
SLX-COL-1300	Device column, profile height: 1280 mm; total height: 1360 mm	R1.593.1300.0	1
SLX-COL-1600	Device column, profile height: 1580 mm; total height: 1660 mm	R1.593.1600.0	1
SLX-COL-1900	Device column, profile height: 1880 mm; total height: 1960 mm	R1.593.1900.0	1
SLX-COL-BASE	Replacement pedestal for columns with spring elements	R1.593.0001.0	1
SLX-COLP-0900	2 protective glasses for SLX-COL device column; length: 820 mm	R1.592.0900.0	1
SLX-COLP-1000	2 protective glasses for SLX-COL device column; length: 980 mm	R1.592.1000.0	1
SLX-COLP-1300	2 protective glasses for SLX-COL device column; length: 1280 mm	R1.592.1300.0	1
SLX-COLP-1600	2 protective glasses for SLX-COL device column; length: 1580 mm	R1.592.1600.0	1
SLX-COLP-1900	2 protective glasses for SLX-COL device column; length: 1880 mm	R1.592.1900.0	1

# SERIES SLD / SLC

## OTHER ACCESSORIES

SLX-ACC-LASER

SLC-ACC-LASERCOL

The external laser-alignment device **SLX-ACC-LASER** (for direct mounting on series SLX/SLD) and **SLC-ACC-LASERCOL** (for mounting on a device column SLX-COL) are used for the adjustment of the optical system of series SLC/SLD.

SLX-ACC-TEST

The test rods **SLX-ACC-TEST** are used for functional testing of protective areas realized by series SLC.

### OVERVIEW OF DEVICES | PART NUMBERS

Type	Description	Part no.	P.U.
SLX-ACC-LASERCOL	External laser adjustment device, for fixing in device column	R1.596.0003.0	1
SLX-ACC-LASER	External laser adjustment device	R1.596.0002.0	1
SLX-ACC-TEST2040	Test bar, 20/40 mm	R1.596.2040.0	1
SLX-ACC-TEST1430	Test bar, 14/30 mm	R1.596.1430.0	1
SLX-ACC-MKEY	Magnet key for activation of laser adjustment device	R1.596.0001.0	1

# SERIES SLC / SLD

## MUTING ACCESSORIES

**SLX-MUTC-SET2P**

The Muting-Set **SLX-MUTC-SET2P** is used for realizing a 2-sensor cross muting e.g. in combination with device columns SLX-COL to be ordered separately or directly onto the SLD safety light grids.

The Muting-Set **SLX-MUTC-SET4** (no figure) is used for realizing a 4-sensor-sequence-muting, e.g. in combination with device columns SLX-COL to be ordered separately or directly onto the SLD safety light grids.

The Muting-Set **SLX-MUTC-SET2B** (see figure below) is used for set-up a 2-sensor sequential muting system, e.g. in combination with the SLX-COL device columns to be ordered separately, or directly onto the SLD safety light grids.

### OVERVIEW OF DEVICES

Type	Description	Part no.	P.U.
SLX-MUTC-SET2P	SLX-muting-sensor-set for 2-sensor-parallel-muting, incl. 2 sensor units, 2 reflector units, pre-assembled, distance 8 m, 2 m cable with plug M12	R1.597.0008.0	1
SLX-MUTC-SET4	SLX-muting-sensor-set for 4-sensor-sequential-muting, incl. 4 sensor units, 4 reflector units, pre-assembled, distance 8 m, 2 m cable with plug M12	R1.597.0007.0	1
SLX-MUTC-SET2B	SLX-muting-sensor-set for 2-sensor-sequential-muting, incl. 2 sensor units, 2 reflector units, pre-assembled, distance 8 m, 2 m cable with plug M12	R1.597.0006.0	1
SLX-MUT-REFLEX	Reflector	R1.597.0015.0	1
SLX-MUT-BOX4-BT	Sensor connector box for 4 muting sensors, with mounting plate	R1.597.0019.0	1
SLX-MUT-BOX4-BT-L	Sensor connector box for 4 muting sensors, with L-mounting bracket	R1.597.0021.0	1

Further muting accessories are available on request.

**SLX-MUTC-SET2B**

# SLC/SLD SERIES

## MUTING ACCESSORIES

### OVERVIEW OF DEVICES

Type	Description	Part no.	P.U.
SLX-MUT-BOX2	SLD Professional sensor connection box for 2 muting sensors	R1.597.0017.0	1
SLX-ACC-CONF1	Display and acknowledgement unit	R1.596.0005.0	1

# SERIES SNH

## EMERGENCY STOP BUTTONS

### APPLICATIONS

- Machine and plant manufacturing
- Logistics and automated guided vehicles

### SAFETY LEVEL

- Up to PL e / Category 4 (EN ISO 13849-1)
- Up to SIL<sub>CL</sub> 3 (EN 62061)

### FEATURES

- For applications up to IP69K
- Tamper-proof according to EN 418/EN ISO 13850
- Modular design
- Turn-to-reset
- Integrated illumination (optional)
- Optical indication of the switching state

### FUNCTION

Emergency stop buttons of the SNH series are used on or near machines for the protection of persons. They serve the purpose of switching off / stopping machines and systems to avoid or reduce emerging or existing hazards to persons. Emergency stop buttons of the SNH series are also used to avoid damage to the machine or working material.

- **Modular design** – The emergency stop buttons of the SNH series have a modular design, various actuating elements can be freely combined with the chosen contact design.
- **Failure protection** – The emergency stop buttons of the SNH series have a special failure protection that automatically detects when a contact block is removed from the respective actuating element and then switches off safely.

## EMERGENCY STOP BUTTONS

TECHNICAL DATA	
Function	
According to EN 418/EN ISO 13850	Emergency stop button
<b>Actuator</b>	
Housing material	Plastic
Protection degree	up to IP69
Operating ambient temperature	-30 – +70 °C (without illumination), -30 – +55 °C (with illumination)
Storage temperature	-50 – +85 °C
Switching cycles	> 50000
Max. torque	2.5 Nm
Installation diameter	22.3 mm
<b>Contact blocks</b>	
Contact type	NC contact NC contact with failure protection NO contact
Contact material	AgNi
Switching principle	Slow-action contact
Actuating travel	6 mm
Mechanical service life	1 x 10 <sup>7</sup> switching cycles
Electrical service life	1 x 10 <sup>6</sup> switching cycles
Application category	AC15 A600: 250 V, 3A DC13 Q600: 24 V, 2A
Protection class	II
Rated insulation voltage	600 V
Min. switching voltage	5 V
Min. switching current	1 mA
Thermal continuous current I <sub>th</sub>	16 A
Max. through-type thermistor	20 mΩ
Max. bounce time	20 ms
Min. positive opening travel	3 mm
Operating ambient temperature	-30 – +85 °C
Storage temperature	-50 – +85 °C
Connection technology	Screw connection
Conductor cross-section	Max. 2,5 mm <sup>2</sup>
Standards	EN 418 /EN ISO 13850
Approvals	TÜV, cULus
<b>Safety related data</b>	
B <sub>10D</sub> (at DC -13; 24 V; I <sub>e2</sub> = 0.1 A)	250.000 (SNH 0043 + SNH 1143: > 104.000)

# SERIES SNH

## EMERGENCY STOP BUTTONS M12

### APPLICATIONS

- Mechanical engineering and plant construction
- Logistics and automated guided vehicles

### SAFETY LEVEL

- Up to PL e / Category 4 (EN ISO 13849-1)
- Up to SIL<sub>CL</sub> 3 (EN 62061)

### FEATURES

- Use up to IP67
- Tamper-proof according to EN 418/EN ISO 13850
- Rotary release
- Optical display of the switching status
- M12 connection, 5-pole A-coded

### FUNCTION

Emergency stop buttons M12 of the SNH series are used for the protection of persons at or near machines. They are used to shut down / stop machines and systems in order to avoid or reduce emerging or existing hazards to persons. M12 emergency stop buttons of the SNH series are also used to prevent damage to the machine or working material.

- **Plug and Play** – M12 emergency stop buttons of the SNH series are pre-assembled variants for quick and easy installation. The 5-pole M12 connection reduces the cabling effort and thus the probability of wiring errors.
- **Flexible use** – The emergency stop buttons of the SNH series have a special failure protection that automatically detects when a contact block is removed from the respective actuating element and then switches off safely.

SNH 1102 M12	Emergency stop button, complete device, tamper-proof, with integrated M12 connector, 5-pole. A-coded, AIDA, rotary release left/right, switch position indicator, contact configuration 2 O, IP65/IP67	R1.210.1102.0	1
SNH 2402 M12	Emergency stop set, complete device in housing, fail-safe with integrated M12 connector, 5-pole. A-coded, AIDA, rotary release left/right, switch position indicator, contact configuration 2 O, IP65	R1.210.2402.0	1

### DIMENSIONS DIAGRAMM SNH 2402 M12

# SERIES STS

## NON-CONTACT SAFETY SWITCHES WITH CODING

STS 01XX

### APPLICATIONS

- Protection of people or machines
- Position monitoring of machine parts
- Position monitoring of doors and switches of isolating protective devices

### SAFETY LEVEL

- Up to PL e / category 4 (EN ISO 13849-1)
- Up to SIL<sub>CL</sub> 3 (EN 62061)

### FEATURES

- Individual coding for maximum manipulation protection
- Up to 30 sensors can be cascaded
- Automatic or manual start
- LED and semiconductor output for diagnostics
- Switching distance of 8 mm / 10 mm
- Protection class IP67 / IP69K

### FUNCTION

The non-contact safety switches from the STS series are used for monitoring the position of machine parts and the position of doors and switches of isolating protective devices.

The STS series features integrated evaluation and built-in manipulation protection.

In the event of a hazard, access is approved or the machine is shut down, for example, by a device from the **safe**RELAY series or the **samos**<sup>®</sup> / **samos**<sup>®</sup>PRO safety system or by the safety switch directly.

Safety switches from the STS series are also able to switch larger loads without wear via safe outputs (OSSDs).

### CONNECTION ASSIGNMENT STS WITH CABLE CONNECTION

Function	Colour
UB	BN
Safety input 1	WH
GND	BU
Safety output 1	BK
Diagnostic output	GY
Safety input 2	PK
Safety output 2	VT

GND	3
Safety output 1	4
Diagnostic output	5
Safety input 2	6
Safety output 2	7
EDM-start input	8

# SERIES STS

## NON-CONTACT SAFETY SWITCHES WITH CODING

### TAILOR-MADE MANIPULATION PROTECTION

Different applications require different solutions when it comes to existing manipulation protection.

Safety switches from the STS series have 3 different coding variations, which means that they can always offer the right solution.

#### Coded:

The safety switch accepts every STS actuator.

#### Fully coded:

The safety switch only accepts the programmed-in STS actuator.

#### Unique:

The safety switch only accepts STS actuator delivered with it. An STS actuator cannot be programmed in.

### DIVERSE INSTALLATION

The 5 actuation directions of the STS series and the maximum displacement between the actuator and switch element of 8 mm make installation easy even when the protective device to be monitored has large mechanical tolerances.

The resulting advantage is that it can be used universally on removable, rotatable, or sideways-moving protective devices.

5 different actuation directions for universal use

# SMI 1001

## MAGNETIC SWITCH INTERFACE

### FUNCTION

The SMI 1001 connects safety switches / position switches in series. Several safety switches or position switches can be connected to safe RELAY safety switching devices or to samos® and samos®PRO safety systems and evaluated.

### APPLICATIONS

- Connecting in series of two-channel sensors with contact assignment NO/NO up to PL d / Kategorie 3 (EN ISO 13849-1)

### FEATURES

- Control via a maximum of 4 two-channel sensors
- Signal output for each sensor
- Optical indication of the switching state of each sensor

The SMI 1001 features status displays for the switching state of the NO circuits of the connected sensors as well as four diagnostics outputs for the display of the switching state of the NO circuits via external LEDs or a control.

Approvals	cULus

### APPLICATION

# SIN M SERIES

## SAFETY SWITCH WITH SEPARATED ACTUATOR AND GUARD LOCKING

SIN 9005 M

SIN 9006 M

SIN 9007 M

### APPLICATIONS

- Personnel protection on machines with dangerous machine parts which move after switching off
- Locking of a machine or an automatic process when the guard is open
- Position monitoring of guard and guard locking

### FEATURES

- Suitable for locking devices in accordance with EN 14119
- Flexible use with 4 horizontal or 4 vertical actuating directions
- Integrated protection against simple bypassing
- Long service life thanks to dust- and water-proof housing and a broad operating temperature range of up to 70 °C
- Locking force 1,500 N

### FUNCTION

The mechanical safety switches in the SIN series are suitable for the secure locking (guard locking) of safety doors until a hazardous machine process has ended.

The safety switches have two independent contact blocks which reflect the position of the actuator on the one hand and the position of the guard locking on the other.

The release of the entry or the shutdown of the machine in case of danger is done by the evaluation of the contact blocks by means of a suitable basic device of the **safe** RELAY series or one of the safety systems **samos**® or **samos**® PRO.

### SPRING-ACTUATED LOCKING

The safety switch on the guard is locked automatically when the actuator reaches its end position.

The guard is unlocked by applying a current to the internal electromagnets in the safety switch.

### MAGNET-ACTUATED LOCKING

The safety switch on the guard is locked by energizing the internal electromagnet when the actuator reaches its end position.

When the current to the internal electromagnet is switched off, the guard locking is released and the guard can be opened.

### VERSATILE INSTALLATION

Thanks to the adjustable actuator head and the large selection of actuators, the safety switch can be used to implement guard locking devices for all applications in machine construction.

Universal use through 8 different actuating directions and 5 different actuators:

## SAFETY SWITCH WITH SEPARATED ACTUATOR

### FUNCTION

The mechanical safety switches in the SMS 2xxx, SMS 3xxx and SMS 4xxx series are suitable for the reliable position monitoring of movable guards (EN 60947-5-3).

If the associated guard on the machine is opened, the hazardous machine movement is switched off.

The machine is shut down in a hazardous situation by an analysis of the contacts carried out by a suitable basic device in the safeRELAY or by one of the samos® or samos®PRO safety systems.

Simple installation and wiring in each application.

## POSITION SWITCH

### APPLICATIONS

- Monitoring of doors, hoods or flaps
- Position detection of moving machine parts
- Object detection in conveying systems
- End position monitoring of components
- Position detection of roller doors
- Monitoring of sliding doors

### FEATURES

- Position switch to EN 50047
- Optimized contact safety: 1 mA at 24 V DC
- Tool-free rotation and replacement of actuating device
- Actuating device from metal
- Protection rating IP66 and IP67
- Self-cleaning contacts
- Mechanical service life: up to 30 million switching cycles
- Simple adjustment and wiring for any application

### FUNCTION

SLS series mechanical safety switches are suitable for the safe position monitoring of movable guards (EN 60947-5-3).

If the corresponding guard on a machine is opened, the hazardous machine movement is stopped.

In a hazardous situation, the machine is shut down when the contacts are evaluated by a suitable safe RELAY basic device or by either the samos® or samos® PRO safety system.

### OVERVIEW OF DEVICES

Type	Function	Actuator	Contacts	Part number	P.U.
SLS 5150	Position switch	Plunger, plastic	Snap-action contact, 1 NC / 1 NO	R1.340.5150.0	1
SLS 5130	Position switch	Plunger, plastic	Snap-action contact, 2 NC	R1.340.5130.0	1
SLS 6250	Position switch	Plunger, metal	Snap-action contact, 1 NC / 1 NO	R1.340.6250.0	1
SLS 6230	Position switch	Plunger, metal	Snap-action contact, 2 NC	R1.340.6230.0	1
SLS 6350	Roller switch	Roller, plastic	Snap-action contact, 1 NC / 1 NO	R1.340.6350.0	1
SLS 6330	Roller switch	Roller, plastic	Snap-action contact, 2 NC	R1.340.6330.0	1
SLS 6550	Roller switch	Roller, plastic	Snap-action contact, 1 NC / 1 NO	R1.340.6550.0	1
SLS 6530	Roller switch	Roller, plastic	Snap-action contact, 2 NC	R1.340.6530.0	1
SLS 6650	Roller switch	Roller, plastic	Snap-action contact, 1 NC / 1 NO	R1.340.6650.0	1
SLS 6630	Roller switch	Roller, plastic	Snap-action contact, 2 NC	R1.340.6630.0	1
SLS 6950	Roller switch	Roller, rubber	Snap-action contact, 1 NC / 1 NO	R1.340.6950.0	1
SLS 6930	Roller switch	Roller, rubber	Snap-action contact, 2 NC	R1.340.6930.0	1

# GLOSSARY

**Emergency stop monitoring**  
Floating contacts

**Protective gate monitoring**  
Floating contacts

**Position monitoring**  
Magnetic switch

**Safety light grid / -light curtain**  
acc. to EN 61496 BWS Type 4 / Type 2

**Two-hand control**  
according to EN 574

**Controlled Stop**  
according to EN 60204-1 stop category 1

**Standstill and motion monitoring**

**Safety shut-off mat monitoring**  
(4-wire principle, short-circuiting)

**Valve position monitoring**

**Contact expansion**

**Machine building industry**

**Press**

**Elevator systems**  
in accord. with EN 81-1

**Combustion plants**  
according to EN 50156-1

**Process technology**  
according to IEC 61511

**Finger protection**

**Hand protection**

**Arm protection**

**Access protection**

**Personal protection**

**Single-channel input circuit**  
1 NC contact or semiconductor

**Two-channel input circuit**  
2 NC contacts or semiconductors

**Two-channel input circuit, antivalent**  
1 NO / 1 NC contacts or semiconductors

**Cross monitoring**  
between two input circuits

**Synchro-check**  
between two input circuits

**Safe Start**  
Start command is accepted only when the input circuits are closed

**Combi-reset**  
Automatic start possible after voltage failure, based on the risk analysis

**Automatic Reset**  
after application of the voltage and/or after safety request

**Manual Reset**  
in the case of a rising edge at the reset input

**Reset button monitoring**  
in the case of a falling edge at the reset input

**Contacts (NO/NC)**  
safe semiconductor outputs

**Alarm contacts**

**Safe changeover contacts**

**Safe semi conductor outputs**

**Safe OFF-delay**

**Safe ON-delay**

**Monoflop**  
for rapid tactile applications

**Reset of time lapse**  
for OFF-delayed contacts

**Expanded diagnostics**

# INFO TO GO

All brochures from Wieland Electric are available for download on our website.
