COMMON GOAL

Our common goal is to satisfy the end customer, and we accomplish this through openness, honesty and effective cooperation.

We have a moderate number of manufacturers so that we can maintain personal, close and direct relationships with them.

CABLES AND WIRES

HELUKABEL is an international manufacturer and supplier of cables, wires, and cable accessories. The company develops optimal cable and wire solutions for its customers. HELUKABEL has, for example, a wide range of industrial chain cables, control cables, instrumentation cables, also motor cables and servo cables in direct stock.

Amokabel manufactures various wires and cables for industry and network construction needs. The company's product range includes Harmonized wires, automotive wires, multinorm wires, and cables for mining and marine. Customized cables are also available.

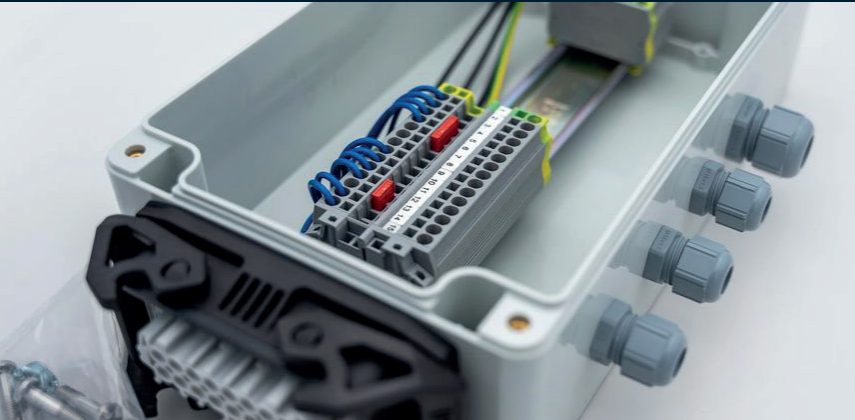

Studer Cables is a manufacturer of cable solutions and systems. The company is internationally recognized for its high-quality industrial cables, designed to withstand the most demanding conditions. Studer Cables is also especially well known for its temperature-resistant, halogen-free cables and wires produced using electron-beam cross-linking.
