

RST®

INSTALL **EFFICIENTLY**

Pluggable electrical installation systems
in highest IP rating.

HELLO WIELAND ELECTRIC

Tradition and innovation - Wieland is representing the synergy of these two guiding principles for more than 100 years.

At Wieland Electric, we are proud to be the world market leader in electrical connections, and have been focusing on safe and innovative technologies since our founding. The beginnings of our success lie in the legendary Wieland Clamp, the first-ever safe electrical connector. Since then, innovation has pushed us to develop safer and more efficient ways to electrify the world.

Expanding from a component-only manufacturer, we are now one of the leading suppliers of innovative, future-oriented, and complete electrical solutions.

The focus here is on the “Installation Systems” and “Safety Automation” sectors. The Installation Systems sector focuses on decentralized energy distribution in modular construction, building automation, EV charging and lighting solutions. In the Safety Automation sector, the focus is on systems and services for the functional safety of machines in the mechanical engineering and wind power sectors.

We are at our customers’ side in every step of the project, right from the start. Our experts offer consulting, on-site services, and technical support. We see ourselves as service providers, trainers and subject-matter experts.

RST® MICRO

The miniature connector for
LED lamps, signals and mains.

FEATURES

- + 2-pole to 5-pole
- + 8 A rated current
- + Optionally available in the barrier seal version (water stop)
- + Mechanical + color coding

RST08i2

Mechanical coding (view on connector interface female)	black	light blue	slate gray	pebble gray
Operating voltage (application)	250 V	250/400 V	~50/-120 V	~50/-120 V
Marking of poles	1, 2/N	1, 2/N	1, 2	1, 2

RST08i3

Mechanical coding (view on connector interface female)	black	light blue	slate gray	pebble gray
Operating voltage (application)	250 V with PE	250/400 V	~50/-120 V	~50/-120 V with PE
Marking of poles	1, PE, 2/N	1, 2/N, 3	1, 2, 3	1, 2, PE

RST08i4

Mechanical coding (view on connector interface female)	black	light blue	slate gray	pebble gray
Operating voltage (application)	250/400 V with PE	250/400 V	~50/-120 V	~50/-120 V with PE
Marking of poles	1, PE, 2/N, 3	1, 2/N, 3, 4	1, 2, 3, 4	1, 2/N, 3, 4, PE

RST08i5

Mechanical coding (view on connector interface female)	black	light blue	slate gray	pebble gray
Operating voltage (application)	250/400 V with PE	250/400 V	~50/-120 V	~50/-120 V with PE
Marking of poles	1, 2/N, 3, 4, PE	1, 2/N, 3, 4, 5	1, 2, 3, 4, 5	1, 2, 3, 4, PE

RST® MINI

The small connectors
for extremely confined spaces.

FEATURES

- + 2 to 5-pole
- + 16 A rated current
- + Mechanical + color coding

RST16i2

Mechanical coding (view on connector interface female)	black	light gray	leaf green	light blue	turquoise	signal brown
Operating voltage (application)	250 V	250 V	250/400 V	250/400 V	250/400 V	~50/-120 V
Marking of poles	L, N	L, N	1, 2	1, 2	D1, D2	1, 2

RST16i3

Mechanical coding (view on connector interface female)	black	light gray	leaf green	light blue	turquoise	signal brown
Operating voltage (application)	250 V with PE	250 V with PE	250/400 V with PE	250/400 V	250/400 V with PE	~50/-120 V
Marking of poles	L, N, PE	L, N, PE	1, 2, PE	1, 2, 3	D1, D2, PE	1, 2, 3

RST16i4

Mechanical coding (view on connector interface female)	black	light gray	signal brown
Operating voltage (application)	250/400 V with PE	250/400 V with PE	~50/-120 V
Marking of poles	1, 2, 3, PE	1, 2, 3, PE	1, 2, 3, 4

RST16i5

Mechanical coding (view on connector interface female)	black	light gray	turquoise	light blue	signal brown
Operating voltage (application)	250/400 V with PE	250/400 V with PE	250 V with PE	250/400 V with PE	~50/-120 V
Marking of poles	1, 2, 3, N, PE	1, 2, 3, N, PE	L, N, PE, 1, 2	1, 2, 3, 4, 5	1, 2, 3, 4, 5

RST® CLASSIC

The all-rounder with the most extensive range.

FEATURES

- + 2-pole to 7-pole
- + 20 A rated current
- + Mechanical + color coding
- + Applications in protection class II and extra-low voltage sector for industry and LED technology

RST20i2

Mechanical coding (view on connector interface female)	black	light gray	leaf green	pebble gray	signal brown
Operating voltage (application)	250 V	250 V	250 V	~50/-120 V	~50/-120 V
Marking of poles	L, N	L, N	L, N	+, -	1, 2

RST20i3

Mechanical coding (view on connector interface female)	black	light gray	leaf green	light blue	signal brown
Operating voltage (application)	250 V with PE	250 V with PE	250/400 V with PE	250/400 V	~50/-120 V with PE
Marking of poles	L, N, PE	L, N, PE	1, 2, PE	1, 2, 3	1, 2, PE

RST20i4

Mechanical coding (view on connector interface female)	black	light gray	signal brown
Operating voltage (application)	250/400 V with PE	250/400 V with PE	~50/-120 V
Marking of poles	1, 2, 3, PE	1, 2, 3, PE	1, 2, 3, 4

RST20i5

Mechanical coding (view on connector interface female)	black	light gray	turquoise	light blue	pebble gray	signal brown
Operating voltage (application)	250/400 V with PE	250/400 V with PE	250 V with PE	250/400 V	250/400 V	~50/-120 V
Marking of poles	1, 2, 3, N, PE	1, 2, 3, N, PE	D1, D2, L, PE, N	1, 2, 3, 4, 5	N, E, 1, 2, 3	1, 2, 3, 4, 5

RST20i6

Mechanical coding (view on connector interface female)	turquoise
Operating voltage (application)	250/400 V with PE
Marking of poles	L, N, PE, 1, 2, Ls

RST20i7

Mechanical coding (view on connector interface female)	black	light gray	turquoise	light blue
Operating voltage (application)	250/400 V with PE	250/400 V with PE	250/400 V with PE	250/400 V
Marking of poles	1, 2, 3, 4/N, 5, 6, PE	1, 2, 3, 4/N, 5, 6, PE	L, N, PE, 1, 2, 3, 4	1, 2, 3, 4/N, 5, 6, 7

RST25i3

Mechanical coding (view on connector interface female)	Concrete gray
Operating voltage (application)	250 V with PE
Marking of poles	L, N, PE

RST25i5

Mechanical coding (view on connector interface female)	Concrete gray
Operating voltage (application)	250/400 V with PE
Marking of poles	L, N, PE, 1, 2

RST® CLASSIC	228
RST® CLASSIC ATEX	229
RST® POWER	238
RST® DISTRIBUTOR	244

GENERAL NOTES

Safety notes

- All components must be installed, commissioned, and serviced only by trained electricians.
- Observe the country-specific regulations for installation.
- Installation connector systems are no substitute for national plug/socket systems for domestic use.
- The connectors are not suitable for current interruption. Never remove or insert the connector under load.
- Connectors with dissimilar voltages must not be joined.
- Potentially-hazardous interchangeability with installation connector systems of other manufacturers is not automatically ruled out through compliance with DIN VDE 0606 T200 or IEC 61535.

Installation notes

- According to the directive, voltage carrying part must be a female connector.
Mounting of a ring line with standards-compliant design therefore not possible.
- The connectors must be protected from bending forces by further measures (e.g. no loads suspended from cables; cable rewinds not hanging freely, etc.).
- Choose a horizontal installation position to ensure water drains away. In accordance with installation regulation IEC 60364-5-52 (DIN VDE 0100-522.3), cable systems must be designed in such a way that damage caused by the ingress of water is avoided.
- Cable and conductor systems must conform to the required protection rating. If water can accumulate or condense, precautions to ensure water drainage must be taken. This applies in particular for the sealing points in the strain relief area.
- If abrasion is possible (flexible installations), cable assembly wear must be taken into account and monitored.
- Avoid kinking the cable in the strain relief area. Minimum bending radii must be respected.
- Absorption of mechanical bending movements in the strain relief area through suitable measures (e.g. cable clamps).
- For connectors with contact seals: Use only one connector with contact sealing, either male or female connector.
- To guarantee compliance with the IP protection rating, cover caps (accessories) must be mounted on all unassigned male or female connectors.
- The installation regulation IEC 60364-5-52 (VDE 0100-520) must be respected.

GENERAL NOTES

Other important notes

- Protection against contact with live parts generally guaranteed, even in the unmated condition.
- For connectors with yellow/green conductor: The connectors are designed such that the yellow/green conductor contact is always leading.
- All components can be locked together.
- The contacts are protected to prevent tensile load on the cable. If the connector is placed under an unusually high tensile load, it will disengage to prevent the wires being pulled out of the contacts and causing a hazard (except RST® POWER).
- The connector system is not designed for permanent operation under water. Unscheduled immersion is, however, possible within the specification.
- Installing the system components directly in the ground is not envisaged. According to IEC 60364-5-52 (VDE 0100-520), connectors must be protected using suitable additional facilities and must be accessible for visual inspection, testing, and maintenance.
- Can be connected only when polarity is correct; 1-pole not contactable.
- 2-pole connectors are in 3-pole housings, one pole is unassigned.
- 4-pole connectors are in 5-pole housings, one pole is unassigned.
- 6-pole connectors are in 7-pole housings, one pole is unassigned.
- In chlorinated atmospheres, only variants with screw and crimp connections may be used.

INFO TO GO

Further information about the correct installation can be found in our white paper "Installation notes for electrical installations in outdoor areas".

 This pole configuration is also our recommendation for the connector / device connector interface executed by the customer.

GENERAL TECHNICAL DATA

Definition of our numerical code

A logical structure makes ordering easy

Our numerical code saves time and effort when ordering our cable assemblies. Your needs can be compiled quickly and efficiently.

The way it works is simple and refers to our part numbers, which have a consistent structure. Your customized product can be ordered in just a few steps.

GENERAL TECHNICAL DATA

IP ratings

Definition of IP ratings (DIN EN 60529-1)

IP

1st digit

2nd digit

68

Example

IP ratings against ingress of objects and contact		IP ratings against ingress of water	
	Protection against contact		Protection against ingress of water
0	No protection	0	No protection
1	Any large surface of the body (e.g. back of hand)	1	Protection against vertically falling drops
2	Finger	2	Protection against diagonally (up to 15°) falling water drops
3	Tools and wires (> 2.5 mm in diameter)	3	Protection against spraying water up to 60° to the vertical
4	Tools and wires (> 1.0 mm in diameter)	4	Protection from splashing water from any direction
5	Complete protection against contact	5	Protection against jet spray water
6	Complete protection against contact	6	Protection against powerful water jets
7		7	Protection against temporary immersion in water
8		8	Protection against continuous immersion in water
9		9	Protection against high pressure, high temperature spray downs

GENERAL TECHNICAL DATA

Always the right cable

One of the decisive factors for the longevity of your system is the perfect interplay between the materials used in order to be able to withstand the different environmental conditions

While all connectors and distributors are designed for permanent operation indoors and outdoors, things are a little different when it comes to the cables. The selection of the appropriate cable is of utmost importance for the durable operation of the installation.

As a standard, we offer the H05VV-F and H05Z1Z1 cable, but its field of application is limited to indoor use. These cables are not suitable for outdoor use and permanently damp or wet rooms! The protection against foreign bodies (IP 6X) is in the foreground here. Temporary moisture for cleaning purposes is possible.

Temporary outdoor installations without special requirements can be realized with the rubber hose cable H07RN-F, whereby it must also be checked here whether an additional measure, such as laying in installation pipes, is necessary.

In the event that installations are directly exposed to environmental influences over a longer period of time, the selection of the suitable cable must be discussed with Wieland.

H05VV-F PVC CABLE

Use inside dry rooms, not outdoors, not directly in the ground.

No UV resistance.

- **Minimum bending radius:**
4 x outside diameter
- **Service temperature:**
5 °C (laying and handling)
to +70 °C

H07RN-F RUBBER-SHEATHED CABLE

Use inside dry, damp, and wet rooms, as well as outdoors, but not directly in the ground.

Limited UV resistance.

- **Minimum bending radius:**
4 x outside diameter
- **Service temperature:**
from -25 °C to +60 °C

H07RN-F (ENHANCED VERSION) EN- HANCED RUBBER-SHEATHED CABLE

Use inside dry, damp, and wet rooms, as well as outdoors due to UV and ozone resistance. The cable is halogen-free and flame-retardant. But do not lay the cable directly in the ground.

- **Minimum bending radius:**
4 x outside diameter
- **Service temperature:**
from -50 °C to +90 °C

Crimp connection ¹⁾	-	0.2 - 2.5 mm ²	-	-

 RST® terminals with screw clamping allow the connection of conductors without special preparation according to EN 60999-1.

1) Crimp contacts must always be ordered separately to the connector. The range of crimp contacts can be found in RST® CLASSIC accessories.

RST20i7/i6:

- 2) Restriction of the connection section range for fine-stranded cables, when using connectors with the following strain reliefs.
- Double connection: 0.2 - 0.75 mm²
 - straight, for cables Ø 6 - 10 mm and Ø 10 - 14 mm: 0.2 - 1.5 mm²

For spring forces, please use the following cable end sleeves. These can be found in RST® CLASSIC accessories.

Conductor cross-section	Ferrule
0.5 mm ²	DIN 46228-E0.5-10
0.75 mm ² / AWG 20	DIN 46228-E0.75-12
1 mm ² / AWG 18	DIN 46228-E1.0-12
1.5 mm ² / AWG 16	DIN 46228-E1.5-12

Maximum conductor cross-section when using two flexible conductors on one clamping point for the connector variant double connection with screw connection (ATEX parts excluded):

Number of poles	max. cross-section
2	2.5 mm ²
3	2.5 mm ²
4	1.5 mm ²
5	1.5 mm ²
6	0.75 mm ²
7	0.75 mm ²

We use the thermoplastic material polyamide for our products. The table above shows an extract of substances and the resistance of polyamide at room temperature approx. 20 °C. Contact our customer service to have the material resistance to the substances confirmed or if you have other substances in use that are not included in this list.

RST® POWER ASSEMBLY INSTRUCTION

CABLE ASSEMBLY

1. Pull the housing over the cable
2. Prepare cable (see technical specifications)
3. Insert prepared cable (for screw connections: tighten screws, torque 2 Nm)

Note: Make sure that the cables are firmly fixed in the connections.

CLOSING THE CONNECTOR

1. Introduce contact insert into housing (observe coding)
2. Turn the contact insert as far as it will go
3. Lock the contact insert
4. Tighten gland nut, torque
 - M32 gland nut: 8 Nm
 - M40 gland nut: 14 Nm

RST® POWER ASSEMBLY INSTRUCTION

DEVICE CONNECTOR

1. Join the parts together
2. Use the adapter ring for M40 bores

i Housing wall thickness: 2 - 7 mm
Surface: smooth and even

3. Engage bayonet ring, insert fixing pin into corresponding bore
4. Tighten locknut (torque: 2 Nm)

5. Introduce contact insert into device connector housing (observe coding)
6. Turn the contact insert as far as it will go
7. Lock contact insert (connected cable left out for clarity)

8. Plug in RST® connection
9. Close bayonet

OPTIONS

Fixing pin on flange

Fixing pin on mounting plate

Lock connection

Seal

i Proceed in the same way for 4 and 5-pole connectors.
Observe the pole configuration.

NOTE: Please note that electrical connections and installations must be carried out only by appropriately trained specialists.

RST® DISTRIBUTOR TECHNICAL DATA

RST® compact and multiple distributors	
Rated voltage	250/400 V
Rated current	20 A (25 A)
Temperature range:	-40 °C to +100 °C
Material	Contact parts: Brass, silver-plated
	Housing parts: thermoplastic PA 66, halogen-free, V2
	Sealing material: NBR
Wiring	RST® MINI Standard: 1.5 mm ² , halogen free RST® CLASSIC Standard: 2.5 mm ² , halogen free (other cross-sections on request)
Directives	DIN VDE 0606 T200; DIN EN 61984 (VDE 0627); VDE 0110 IEC 60999
Certificates / approvals	VDE A direct assignment between approval and article number can be found in the eShop at http://eshop.wieland-electric.com , or speak to us.
Protection rating	IP66/68 (3m; 2h)/69 Special variants may offer different degrees of protection.
IK code	IK 07 (2 joules) to DIN EN 62262
Coding	Mechanical coding symbolized through color code. Gray and black with the same mechanical coding. Other codings optional.
Notes	Protection against contact generally guaranteed, even in the unmated condition Yellow/green conductor leading. According to the directive, voltage carrying part must be a female connector. Assembly of ring line with standards-compliant design therefore not possible! Can be connected only when polarity is correct; 1-pole not contactable. Contacts protected to prevent tensile load on the cable. All components can be locked together. In accordance with approval to DIN EN 61535, a lock must be provided. Potentially-hazardous interchangeability with installation connector systems of other manufacturers is not automatically ruled out through compliance with DIN VDE 0606 T200! Installation connector systems are no substitute for national plug/socket systems for domestic use.
